Analytics

• Bullish-

-Shows bullish stocks with details In the Money and Out the Money contract details with Bid Price, Total Premium & % Return

• Bearish

-Shows bearish stocks with details In the Money and Out the Money contract details with Bid Price, Total Premium & % Return

Neutral

-Shows contract with details Daily IV, Call OI, Put OI, Call/PUT Volume & LTP

•IV Scanner

-Shows contract with details IV %, Volume, OI & Delta, Theta, Gamma & RHO, Vega & Theoretical Price

Analytics

• IV (Implied Volatility) -

•Implied volatility is the market's forecast of a likely movement in a security's price. Implied volatility is often used to price options contracts: High implied volatility results in options with higher premiums and vice versa. Implied volatility increases in bearish markets and decreases when the market is bullish.

•OI (Open Interest)

-Open interest is the total number of outstanding derivative contracts, such as options or futures that have not been settled. Increasing open interest represents new or additional money coming into the market while decreasing open interest indicates money flowing out of the market

• Delta, Theta, Gamma & Vega

-Delta, gamma, vega, and theta are known as the "Greeks", and provide a way to measure the sensitivity of an option's price to various factors. For instance, the delta measures the sensitivity of an option's premium to a change in the price of the underlying asset; while theta tells you how its price will change as time passes

Scanner

Strong and Weak

-Scanner that displays upside/downside strength of the stock based on open interest change and the related price change

Rising and Falling

-This shows the stock volume is increasing/ Price Increasing or Decreasing in previous 3 trading session.

•High Low Breakers

-Shows stock breaching the low/High in particular time period like 1 day, 1week, 1 Month or 52 Week

•Resistance and Support

-Shows nearest resistance and support level of the stocks based on pivot of previous days High /Low /Close with an easy to filter stock at particular level.

Volume Shockers

-Shows unusual volume and Potential volume

•Circuit Breaker

-Shows hitting upper and lower circuit of the day

Spread Changes

-shows stock having highest change in spread between Cash and near month future contract
