Healthy Q4; CPCB IV+ stabilization ahead

Quick Pointers:

- Q4FY25 domestic/export mix stood at 80%/20% (vs 85%/15% in Q4FY24).
- The YoY expansion in the EBITDA margin was impacted by a one-time gain of ~Rs600mn recorded under other expenses in the base quarter.

We revise our FY26/27 EPS estimates by -1.2%/-2.1% given the cautious export outlook amid tariff and geopolitical uncertainties. Cummins India (KKC) reported a revenue growth of 6.4% YoY, while EBITDA margin shrunk by 235bps YoY to 21.2% against a high base. The pre-buy of CPCB IV+ compliant gensets in base quarter saw a YoY decline in powergen segment. While volumes and pricing of CPCB IV+ products are expected to stabilize over the next few quarters, powergen continues to benefit from strong demand across end industries, including emerging opportunities in power backup for quick commerce. Meanwhile, the Industrial segment growth is being driven by traction in Railways & construction while cyclicalities of compressors and shifts towards private miners warrant a cautious stance on the compressor and mining sectors. On the export front, Europe and Latin America remain the primary growth drivers while tariff related and geopolitical uncertainties muddle the water. Management guided for double-digit growth in FY26 with sustained margins aided by cost saving initiatives. We roll forward to Mar'27E and maintain 'Buy' rating with a revised TP of Rs3,646 (Rs3,309 earlier), valuing the company at a PE of 42x Mar'27E (40x Sep'26E earlier).

Long term view: We expect Cummins' outlook to remain intact given 1) strong domestic demand in Powergen across sectors with CPCB 4+ products witnessing traction, 2) maintain margin profile and 3) ample room for growth in the Distribution business. The stock is trading at a P/E of 41.8x/36.5x FY26/27E.

High base effect marred the YoY growth: Standalone revenue increased by 6.4% YoY to Rs24.1bn (PL: Rs26.1bn), led by strong growth in exports (39.2% YoY to Rs4.8bn) while domestic sales remained flattish YoY at Rs19.4bn. Gross margin improved by 116bps YoY to 37.2% (PL: 34.9%). EBITDA declined 4.5% YoY to Rs5.2bn (PL: Rs4.9bn) while EBITDA margin lowered by 235bps YoY to 21.2% against a high base (PL: 18.6%) due to higher other expenses (+124.6% YoY to Rs2.3bn). NOTE: Q4FY24 other expenses included ~Rs600mn one-time benefit making it a very low base. Excluding this one-time benefit in base quarter, EBITDA margin improved ~228bps YoY. PBT declined 2.8% YoY to Rs6.8bn (PL: Rs6.4bn). PAT declined 7.2% YoY to Rs5.2bn (PL: Rs4.9bn) due to high base effect and higher effective tax rate (23.4% vs 19.8% YoY).

Strong export growth aided by both LHP and HHP exports: Domestic sales rose 0.5% YoY to Rs19.4bn driven by Industrial (up 8.9% YoY to Rs3.8bn) and Distribution (up 4.5% YoY to Rs6.3bn) while Powergen declined 7.3% YoY to Rs8.7bn. FY25 Powergen sales mix stood at 60%/7%/13%/19% for HHP/HHD/MHP/LHP. Exports jumped by 39.2% YoY, to Rs4.8bn. Export mix stood at 45%/45%/10% for LHP/HHP/Spares in Q4FY25. LHP exports increased by 51.4% YoY to Rs2.2bn, while HHP exports increased by 27.5% YoY to Rs2.2bn and spares increased by 48.4% YoY to Rs460mn.

Exhibit 1: Revenue increased driven by export growth while adj. PAT declined 7.2% YoY to Rs5.2bn against a high base

Conference Call Highlights

- **Guidance:** The management guided for double digit revenue growth for FY26 while they remain cautiously optimistic due to geopolitical and tariff uncertainties.
- **Powergen revenue declined by 7.3% YoY to Rs8.7bn**, primarily due to high base in Q4FY24 on account of pre-buy of CPCB IV+ compliant gensets. KKC's Powergen segment continues to see traction from residential and commercial realty, infra segment, data centers etc. Meanwhile, quick commerce is emerging as a new opportunity as quick commerce players open more dark stores which may require power backup. The CPCB IV+ volumes may take a couple more quarters to reach the volume levels previously saw in CPCB II while the pricing continues to settle down as competition increases.
- **Industrial revenue grew by 8.9% YoY to Rs3.8bn.** The growing ordering traction from Railway segment has warranted management's positive outlook while the construction segment is also expected to grow in-line with India's industrial growth. Meanwhile, the compressor segment is expected to enter a downturn of its cyclicity leading to muted growth. KKC was anticipating better orders from Mining segment however, delay in tenders from Coal India and shift towards private miners have led to management's cautious stance on the sector. Meanwhile, KKC will continue to work with private miners.
- **Distribution revenue increased 4.5% YoY to Rs6.3bn.** The growth of the distribution business is being aided by long term contracts in its Industrial segment while management's initiatives to improve distribution footprint into powergen is coming to fruition. Management remains positive on the distribution segment outlook and expects the segment to growth in double digits going forward.
- **Exports jumped 39.2% YoY to Rs4.8bn.** Latin America and Europe continue to remain the primary growth driver for the company's exports. However, given the current geopolitical and tariff related uncertainties, management remains cautious about the outlook for exports. LHP exports (+51.4% YoY to Rs2.2bn) and HHP exports (+27.5% YoY to Rs2.2bn) along with growth in spares (+48.4% to Rs460mn) contributed to the jump in exports in Q4FY25.
- **Data center linked genset demand remains strong:** Despite the increasing competition in the data center space, KKC's well accepted products due to its better after market services, places it at the forefront to capture the emerging high growth opportunity. Furthermore, it also provides components for the gensets supplied to the export markets further fueling the export growth.
- The company will maintain **capex of ~Rs2.5-3.0bn in FY26** primarily related to sustenance of operations.
