

### **PREFACE**

#### **Greetings from Prabhudas Lilladher!**

The Indian equity markets were flat in January 2019 with the S&P BSE Sensex up by 0.5%, and the Nifty 50 down by -0.3%. The performance of the broader market was not very encouraging either, as the BSE Midcap & the BSE 200 both underperformed the Sensex with a performance of -5.7% and -1.4% respectively.

Q3FY19 earnings season has been encouraging with corporate India delivery healthy double digit EBIDTA growth. Micro story for India, in terms of better corporate earnings growth going forward remains positive, making us optimistic on the long term potential for returns from the Indian Equity as an asset class.

Investment indicators such as capital goods import, private projects under implementation, steel demand and diesel consumption showed a positive trend, indicating improvement in investments.

Headwinds stem from political uncertainty in run upto 2019 elections, rising rural distress given low agri prices, monsoon turnout, GST shortfall, and delay in much awaited capex cycle. Thus, we maintain a cautious view on the market for the next 5-6 months.

In our report, MF Equity & Debt - The Way Forward we summarize how fund managers are reacting to the market. We consolidate and share their views and investment strategies on how to deal with the current market.

Based the fund manager's outlook and suggestions, we have designed three model portfolios with a tactical allocation strategy for Aggressive, Moderate and Conservative investors respectively. The portfolios are expected to ride out the market volatility over the medium to long term.

You may view the performance of our model portfolios on page 20.

We welcome your feedback and any queries regarding your investments in mutual funds on WMS@plindia.com

Warm Regards,

The Mutual Fund Desk

Prabhudas Lilladher Pvt Ltd

#### Note:

Market capitalisation as per AMFI, where:

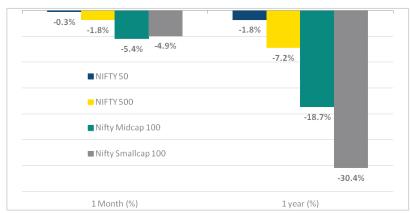

Large-cap: 1st-100th company in terms of full market capitalisation

Mid-cap: 101st-250th company

Small-cap: 250th company and below

### **EQUITY MARKET OUTLOOK**

The market remained volatile and flat in January 2019. The Nifty 50 fell marginally over the month. The broader Nifty 500 index moved higher by about 0.7%. The Nifty Midcap 100, gained 2.1%, while the Nifty Smallcap 100 moved up by 3.7%

(Source: ACE MF, PL research)\*Data as on January 31, 2019

Indian markets remained mixed over January 2019. While IT stock, consumer durables and banks gained, auto stocks, capital goods and metals were among the biggest decliners. Volatility emerged budget and election-related volatility as well as global factors.

While the long-term positives remain intact, the following factors will affect the market going ahead:

### EASING MONETARY POLICY

Monetary easing by the RBI will give a further boost to consumption demand in the country ahead of Lok Sabha polls. With lower rates, borrowing and liquidity conditions are likely to improve. Sectors like banking, discretionary consumption, heavily indebted sectors like steel, power, real estate and infra are likely to be key beneficiaries of the rate cut.

### **GOVERNMENT SPENDING**

India's consumption has been relatively weak in recent quarters, amid fragile growth in disposable income. The government's core revenue expenditure plays an important role in determining rural buoyancy. In the interim budget, the government announced a massive increase in spending for rural areas and projected the country to become a \$5 trillion economy in the next five years. The government will allocate 600 billion rupees a year for farmer income. The government also said it would spend 190 billion rupees for the construction of rural roads.

### **GEOPOLITICAL EVENTS**

From the beginning of 2019, India has witnessed a huge positive change, with crude oil prices receding and rupee appreciating. Global growth is witnessing some disruptions and the US Fed's rate policy and global bond yields will be closely watched. Turbulence for global markets may emerge due to Brexit, and from Italy, Turkey and the Middle East.

### POLITICAL UNCERTAINTY

With the State Elections out of the way, all eyes are now on the General Elections and the steps to current government is likely to take in order to win back voters. The outcome of the State Assembly Elections did not spook the markets early in December. The Modi-led BJP government remains the favorite for the general elections. Yet, there is a possibility of a disruption, which the markets have not ruled out.

### **FUND HOUSE VIEWS** ON THE EQUITY MARKET

AFTER INTERACTING WITH MULTIPLE FUND HOUSES. WE HAVE CONSOLIDATED AND SUMMARISED THEIR VIEW ON THE EQUITY MARKET AS BELOW:

#### INTERIM BUDGET – A FEW GOOD SURPRISES

The FMCG and retail industry has given a thumbs-up to the budget as it will bring in more money in the hands of the consumers and have terms the budget as a consumption-oriented budget. With an increase in rural demand, agricultural inputs such as fertilisers, pesticides and farm equipment are likely to get the boost. The growth in fast moving consumer goods (FMCG) and auto sectors will get a boost from the revival of rural demand and new product launches

#### MID-CAP AND SMALL-CAP STOCKS BEGINNING TO LOOK ATTRACTIVE

The mid-cap and small-cap indices have corrected significantly over the past year and are beginning to show some green shoots. Though the Nifty 50 has remained flat over 1-year, the Nifty Midcap and Nifty Smallcap are down 18% and 30% each. On looking at past data, a divergent performance has often led to a sharp recovery in Midcap and Smallcap stocks in the following months. At the current levels, the mid and small-cap indices seem well-poised for another such recovery.

#### **ELECTION YEARS ARE OFTEN VERY VOLATILE**

Election years often tend to be extremely volatile for the market. This has especially been the case for the market in the last three general elections. Given the surprise election results in the State Assembly Elections, the general elections will be a close fight. A hung parliament may send the market in a tizzy, while a majority government with either party should be a positive for the market.

#### SENSEX VALUATIONS ABOVE FAIR VALUE

The Indian markets are higher than most peers in terms of valuations. The forward price-to-earnings (P/E) of the S&P BSE Sensex is just short of Japan's Nikkei 225, but higher than the benchmark indices of Hong Kong, China, Brazil and other developed market indices. Valuations had cooled-off in the month earlier, but are on the rise once again. In such markets, when there are several risks at play, it is best to approach the market with caution and shift from a large-cap bias to a multi-cap bias

#### PRESSURE ON GOVT'S FISCAL SITUATION GOING FORWARD

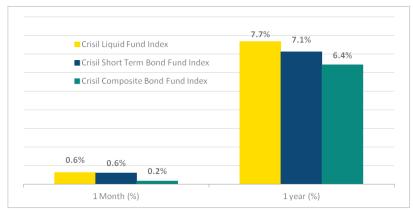

Over the past few months, private vehicle sales have slowed. This has added on to the already weak rural wage growth. Auto volumes have moderated, with the near-term demand trajectory also appearing slightly uncertain due to the rising cost of ownership. However, steel consumption growth has held up well. Domestic demand indicators remain under pressure because of an unfavorable base effect from GST and delayed festive season this year. Though demand indicators are mixed, investment indicators and nascent recovery in private CAPEX continue to bode well for the broader recovery in the economy

### FII FLOWS KEY TO NIFTY RETURNS IN 2019

DII inflows at Rs45.6bn in 2019 YTD are down 44% than Rs81.8bn in 2018. Equity FII inflows have started on a positive note at Rs21bn as against an outflow of Rs342bn in 2018, highest outflow since 2008 (Rs529bn). Debt outflows continue, albeit at a slower pace. FII inflows have been in excess of Rs500bn in all years, which have given double-digit NIFTY returns since 2009. Given the somber start to DII inflows, FII inflows hold key to NIFTY returns in CY2019.

### DEBT MARKET OUTLOOK

The 10-year benchmark G-Sec yield continues to hover around the 7.35% mark. Over the month, yields shot up to 7.4% and eased to around 7.3% after the RBI announced a rate cut.

(Source: ACE MF, PL research)\*Data as on January 31, 2019

Funds investing at the longer end of the yield curve benefited over the past 3-4 months and have recovered some of the losses suffered between June and September 2018. But given the volatile rate environment over the past year, the Liquid Fund index continues to lead with a return of 7.7%, while the Short-term and Composite Bond Fund Index trail with returns of 7.1% and 6.4% each.

Going ahead, the debt market will be affected by the following factors:

### **INFLATION RISKS EASE**

Consumer Price Index (CPI)-based inflation declined to an 18-month low of 2.19% in December 2018 on negative food inflation and softening fuel inflation, besides a high base of the previous year. The current inflation levels at 2.5%, being within the RBI's comfort zone, could still prompt action from the central bank. Gilts declined in the month with yield on the 10-year benchmark 7.17% 2028 paper ending at 7.48% on January 31, 2019, compared with 7.37% on December 31, 2018. Yield on the new 10-year 7.26% 2029 paper settled at 7.28% on January 31, 2019, as against 7.26% on January 11 when it was issued

### LIQUIDITY IMPROVING

Systemic liquidity during the month of January was negative but gradually eased to close at negative Rs 7,900 crores after hitting a high deficit of negative Rs1.12 lakh crores on the back of GST outflows versus negative 77,900 crores at the beginning of the month. Sporadic tightness in systemic liquidity prompted the central bank to conduct regular repo auctions and keep call rates in check. The RBI also conducted reverse repo auctions to prevent the rates from dipping too low and to provide banks with opportunities to park idle funds. The RBI, via its liquidity window, injected Rs 380.97 billion on a net daily average basis in January 2019, compared with net liquidity injection of Rs 1.03 trillion in December 2018.

#### **SLIPPAGE IN FISCAL DEFICIT**

The government presented interim budget for FY20, announcing populist relief measures for farmers & middle class, and taking a pause in fiscal consolidation. Fiscal deficit for FY2019 saw a marginal slippage of 0.1% of GDP to 3.4% (versus target of 3.3%). Fiscal deficit for FY2020 has been projected to remain flat at 3.4% of GDP in FY2020 (versus target of 3.1%). Fixed income market did not take the budget positively due to higher than-expected gross market borrowing and additional market borrowings in FY2019 that are likely to take place in the remaining two months of this fiscal year...

### **FUND HOUSE VIEWS** ON THE DEBT MARKET

AFTER MEETING MULTIPLE FUND HOUSES. WE HAVE CONSOLIDATED AND SUMMARISED THEIR VIEW ON THE DEBT MARKET AS BELOW:

#### RATE CUTS ON THE CARDS

RBI's Monetary Policy Committee reduced the policy repo rate by 25 basis points from 6.5% to 6.25% as against expectations of no change, while simultaneously changing its stance to 'neutral' from 'calibrated tightening'. Inflation forecast was revised to 2.8% for Q4FY19 and 3.2-3.4% in H1FY20 (3.8-4.2% earlier) and 3.9% in Q3FY20, with risks broadly balanced around the central trajectory (earlier risks were tilted on the upside). Growth projection was lowered to 7.4% for FY20, 7.2-7.4% in H1FY20 (7.5% earlier) and 7.5% in Q3FY20. Unexpected rate cut and dovish guidance by the MPC committee led to a rally in fixed income market with 10-year new benchmark rallying by 7 bps and 10 year corporate bonds rallying by 10 bps. The benign inflation outlook improves the possibility of a rate cut in the next fiscal year.

### **RBI'S FOCUS ON LIQUIDITY TO CONTINUE**

To ease liquidity conditions, RBI conducted OMO purchase of Rs 50,000 crore in the month of January 2019. In addition, RBI announced additional OMO purchase of Rs 37.500 crore in the month of February based on its assessment of the durable liquidity needs going forward. RBI has conducted/announced OMOs to the tune of Rs. 2.36 lakh crores and has further announced Rs 37,500 crore of OMO taking the cumulative OMO number for FY19 to Rs 2.73 lakh crore.

### **CAUTIOUS ON HIGHER DURATION**

The bond market could see higher borrowing and there is a possibility that the RBI may not be present in a big way. Bond yields could rise higher on these supply worries along with uncertainty about elections later this year. Worries on the supply-side, fiscal deficit, and election uncertainty could create pressure on the duration side. Thus, many fund managers are cautious on the longer end of the duration. Investors can opt for dynamic bond funds for a tactical allocation.

### TACTICAL ASSET ALLOCATION

### WHAT IS TACTICAL ASSET ALLOCATION?

- Tactical asset allocation, maintains a mix of equity and debt, but is focused on taking a more active approach of positioning a portfolio into asset classes or sub-categories of asset classes that have the most potential for gains
- A tactical approach involves making a judgment call on where the economy and the financial markets may be headed
- Tactical allocation also involves shifting allocations within an asset class. For example, an equity portion of a portfolio may be shifted to include more smallcap stocks, more large-cap stocks, or other areas where there is a short-term opportunity
- Take for example an investors willing to accept more risk in their asset allocation, the traditional aggressive or moderately aggressive investor would be very aggressively positioned at market bottoms, when stock valuations are low
- > Such tactical shifts in allocation provides as investors with the opportunity to earn higher returns with a marginal increase in risk

### TACTICAL VIEW: THE IDEAL STRATEGY

AS THERE HAS BEEN NO SIGNIFICANT CHANGE IN FUND MANAGER OUTLOOK, WE MAINTAIN THE SAME TACTICAL VIEW AS LAST MONTH

#### **EQUITY INVESTMENTS**

- > Preference should be towards large caps funds. Multi-cap funds with a large-cap bias can also be considered
- Mid Cap & Small Cap Funds have turned attractive, and invest through Systematic Investment Plans (SIPs) for the long term
- Asset allocation funds or equity-oriented Hybrid Funds are best suited to ride out the market volatility
- > Very aggressive investors can opt for Sector Funds in the Pharma and Consumption space.

#### **DEBT INVESTMENTS**

- > Stick to Low Duration and Short Duration Funds to deal with the market volatility
- Debt schemes, such as Floater Funds, with an accrual strategy will help capture the current elevated yields
- > Dynamic Bond Funds can help position the duration of the portfolio to benefit from the volatility in the debt market over the medium term
- > Credit Risk funds offer investors with the opportunity to earn a higher return as compared to similar funds with the same duration

### MODEL PORTFOLIOS BASED ON **TACTICAL VIEW**

Based on the market outlook, we have put together three model portfolio's based on the investor's risk profile. You may invest in the suggested schemes in the recommended allocation.

### **AGGRESSIVE RISK PORTFOLIO**

This portfolio is suitable for those investors who are seeking long-term capital growth. The portfolio is invested in equity mutual funds, with the potential to deliver superior long-term returns. The ideal investment horizon is 3-5 years or more.

> **TOTAL EQUITY EXPOSURE: 90% TOTAL DEBT EXPOSURE: 10%**

### **SUGGESTED ALLOCATION**

Scheme Category	Allocation (%)
Large Cap Funds	50%
Mid Cap Funds	20%
Sector Funds	20%
Dynamic Bond Funds	10%

### SUGGESTED PORTFOLIO WITH THE TOP RATED FUNDS

Category Name	Scheme Name	Alloc (%)	1-Month (%)	1-Year (%)	3-Year (%)	Fund Manager
	Axis Bluechip Fund	20	0.00	7.79	16.06	Shreyash Devalkar
Large Cap	UTI Mastershare	20	-2.36	-2.48	12.59	Swati Kulkarni
	ICICI Pru Bluechip Fund	10	-4.42	-3.95	14.66	Sankaran Naren
Mid Cap	Axis Midcap Fund	10	-2.32	3.47	15.36	Shreyash Devalkar
	HDFC Mid-Cap Opportunities	10	-6.07	-13.51	13.68	Chirag Setalvad
Sector	UTI India LifeStyle Fund	10	-6.24	-5.38	11.59	Lalit Nambiar
	Reliance Pharma Fund	10	-3.08	4.20	3.44	Sailesh Raj Bhan
Dynamic	Franklin India Dynamic Accrual	5	0.41	8.49	9.08	Sachin Padwal-Desai
Bond Funds	ICICI Pru All Seasons Bond Fund	5	0.23	6.43	9.65	Manish Banthia
	Total	100				

<sup>\*</sup>Returns as on February 15, 2019

### **MODERATE RISK PORTFOLIO**

This portfolio is suitable for those investors seeking moderate risk-moderate returns. Investors can gain from the long-term gains of equity as well as the income generation and stability of debt investments. The ideal investment horizon should be at least 2 years

**TOTAL EQUITY EXPOSURE: 50%** 

**TOTAL DEBT EXPOSURE: 50%** 

### SUGGESTED ALLOCATION

Scheme Category	Allocation (%)
Aggressive Hybrid Funds*	50%
Large Cap Funds	15%
Short Duration Funds	20%
Dynamic Bond Funds	10%
Credit Risk Funds	5%

<sup>\*</sup>Aggressive Hybrid Funds maintain an approximate allocation of 70% to equity and 30% to debt. Hence, with an allocation of 50% in the portfolio, the net contribution to equity will be 35%, while the net exposure to debt in the portfolio will be 15%.

### SUGGESTED PORTFOLIO WITH THE TOP RATED FUNDS

Category Name	Scheme Name	Alloc (%)	<u>1-Month</u> ( <u>%)</u>	1-Year (%)	3-Year (%)	Fund Manager
Aggressive	ICICI Pru Equity & Debt Fund	25	-4.98	-5.45	13.03	Sankaran Naren
