MF EQUITY & DEBT: THE WAY FORWARD

JANUARY 2019

PREFACE

Greetings from Prabhudas Lilladher!

The Indian equity markets portrayed a mixed trend in December 2018. November had witnessed a recovery after bearishness engulfed the markets the months of September and October. Unfortunately, the trend failed to continue for large caps. Mid Caps and Small Cap, witnessed value buying, taking their stock prices higher.

The Nifty 50 remained directionless with a return of -0.13% in the ultimate month of the calendar year. The Nifty Midcap 100 and Nifty Smallcap 100 indices gained 2.1% and 3.7% respectively.

Though crude oil prices have eased, inflation has cooled off significantly, and the rupee has stabilized, several headwinds continue to threaten the market. Headwinds stem from political uncertainty in run upto 2019 elections, rising rural distress given low agri prices and drought in parts of Maharashtra, Karnataka and Gujarat, GST shortfall, and delay in much awaited capex cycle. Thus, we maintain a cautious view on the market for the next 5-6 months.

In our report, ***MF Equity & Debt – The Way Forward*** we summarize how fund managers are reacting to the market. We consolidate and share their views and investment strategies on how to deal with the current market.

Based the fund manager’s outlook and suggestions, we have designed three model portfolios with a tactical allocation strategy for Aggressive, Moderate and Conservative investors respectively. The portfolios are expected to ride out the market volatility over the medium to long term.

You may view the performance of our model portfolios on **page 20**.

We welcome your feedback and any queries regarding your investments in mutual funds on WMS@plindia.com

Warm Regards,

The Mutual Fund Desk

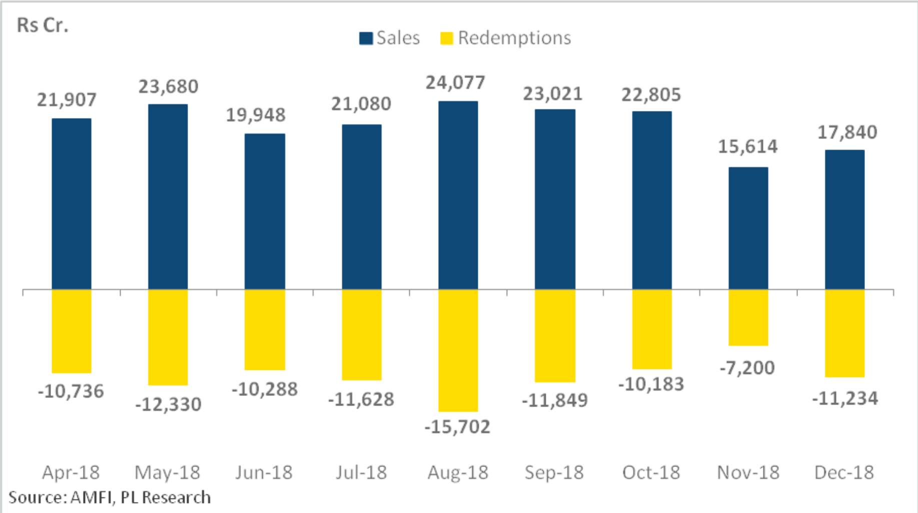
INDUSTRY TRENDS

SALES AND REDEMPTIONS OF EQUITY MUTUAL FUND (INCLUDING ELSS)

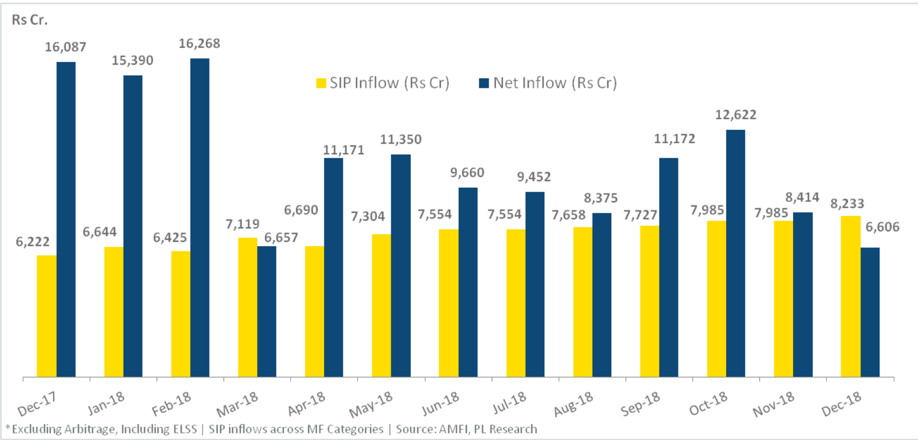
Total AUM: Rs 6,98,546 cr



Net Inflows in mutual funds remained under pressure due to weakened market sentiment and SEBI's ban on upfront commissions. Inflows inched marginally higher in December, when compared to the inflows of the previous month. However, higher redemptions led to outflows.

NET INFLOWS IN EQUITY MUTUAL FUNDS (INCLUDING ELSS)

Total AUM: Rs 6,98,546 crore



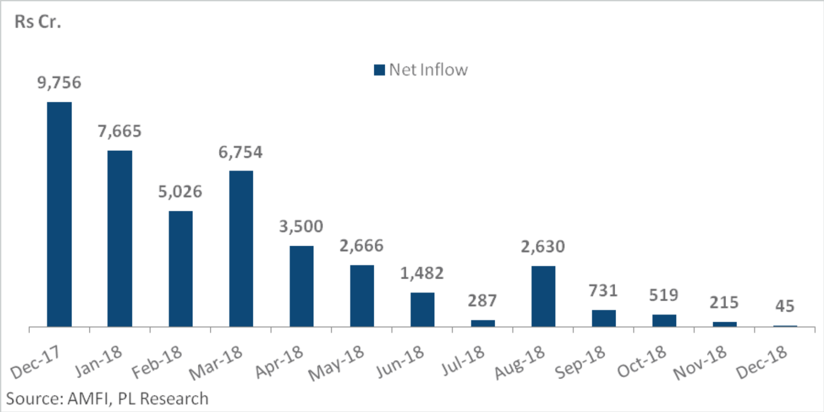
(Source: AMFI, PL Research)

Net inflows into equity mutual funds fell to Rs 6,606 cr, among the lowest seen since the past 10 months.

However, inflows through SIPs peaked to Rs 8,233 cr.

NET INFLOWS IN BALANCED FUNDS

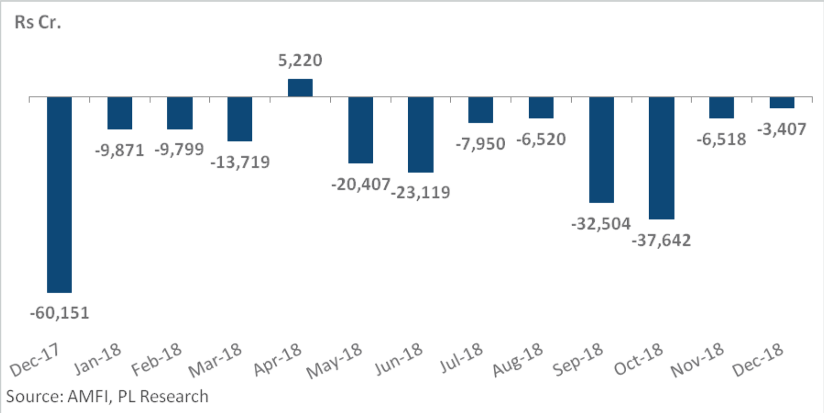
Total AUM: Rs 1,79,411 crore



The interest in Balanced Funds continues to be dismal. Net inflows dropped further to Rs 45 cr. in Dec-2018 from Rs 215 cr. in Nov-2018.

NET INFLOWS IN INCOME FUNDS

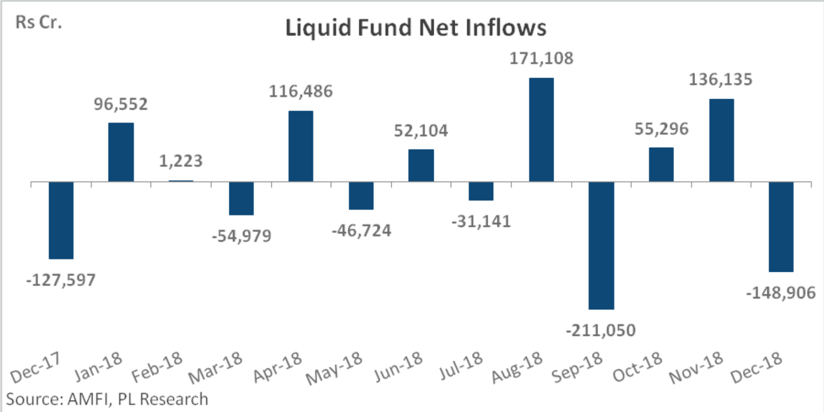
Total AUM: Rs 6,91,779 crore



Income funds continue to register outflows. The net outflow for Dec-2018 reduced to Rs 3,407 cr. from an outflow of Rs 6,518 cr. in Nov-2018.

NET INFLOWS IN LIQUID FUNDS

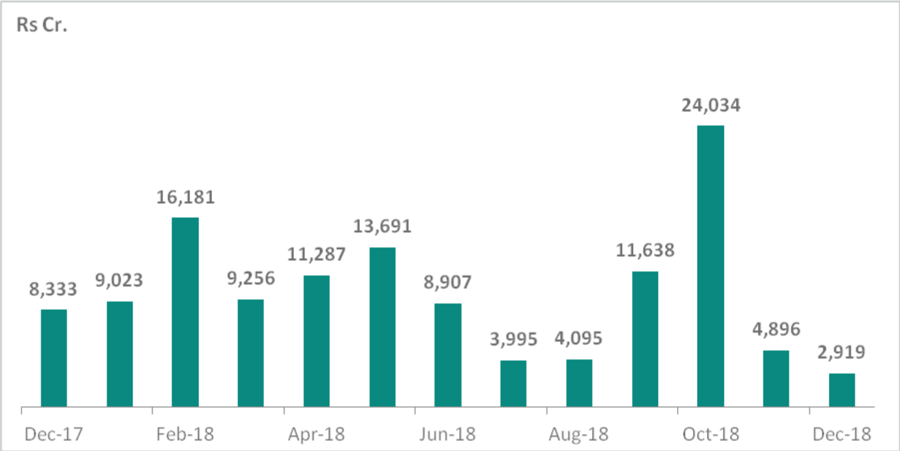
Total AUM: Rs 4,46,229 crore



Liquid and Money Market Funds reported a net outflow of Rs 1.49 lakh cr. in Dec-2018 as compared to a inflow of Rs 1.36 lakh cr. in Nov-2018.

INDUSTRY TRENDS (CONT.)

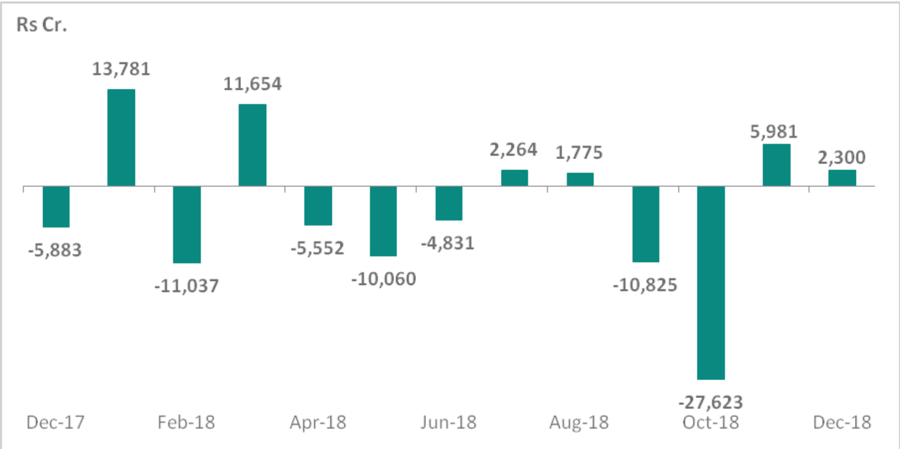
MUTUAL FUND INVESTMENT IN EQUITY



Mutual fund investments in equity remained subdued over the past couple of months. Investments in stocks fell to Rs Rs 2,919 crore in Dec-18 as compared to Rs 4,896 cr in Nov-18.

(Source: SEBI, PL Research) The data is compiled on the basis of reports submitted to SEBI by custodians (NSDL & CDSL) and it constitutes trades conducted by FIIs & Mutual Funds

FII INVESTMENT IN EQUITY

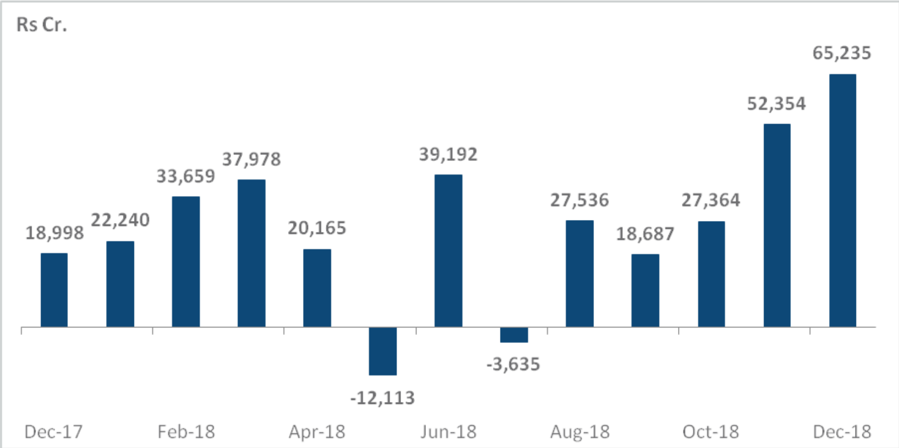


Foreign portfolio investors remained net buyers in Dec-2018, purchasing Rs 2,300 cr worth of stocks. In Nov-2018, FIIs were net buyers of Rs 5,981 crore. Over the past 12 months, FIIs have sold Rs 32,173 crore of Indian equities.

(Source: SEBI, PL Research) The data is compiled on the basis of reports submitted to SEBI by custodians (NSDL & CDSL) and it constitutes trades conducted by FIIs & Mutual Funds

INDUSTRY TRENDS (CONT.)

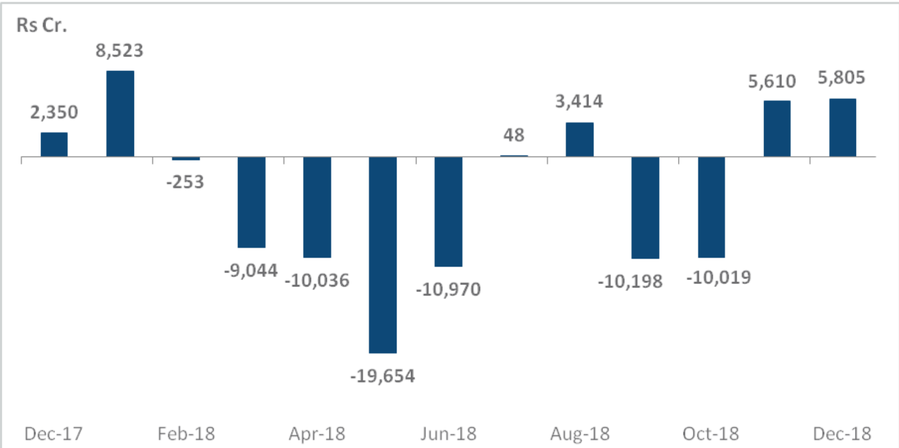
MUTUAL FUND INVESTMENT IN DEBT



Mutual Fund investments in debt remained strong, registering a net inflow of Rs 65,235 cr. in Dec-2018 against an inflow of Rs 52,354 cr. in Nov-2018.

(Source: SEBI, PL Research) The data is compiled on the basis of reports submitted to SEBI by custodians (NSDL & CDSL) and it constitutes trades conducted by FIIs & Mutual Funds

FII INVESTMENT IN DEBT



FIIs remained net buyers of Indian debt in Dec-2018. After two consecutive months of outflows in Sep-18 and Oct-18, FIIs reported a net inflow of Rs Rs 5,610 cr and Rs 5,805 cr in Nov-18 & Dec-18. Net outflows over the past 12 months totaled Rs 46,775 cr.

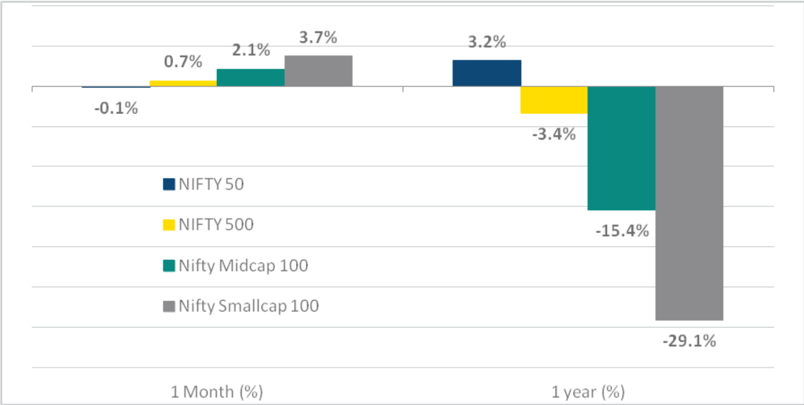
Mid-cap: 101st-250th company

Small-cap: 250th company and below

EQUITY MARKET OUTLOOK

The market remained volatile and flat in December 2018. The Nifty 50 fell marginally over the month. The broader Nifty 500 index moved higher by about 0.7%. The Nifty Midcap 100, gained 2.1%, while the Nifty Smallcap 100 moved up by 3.7%



(Source: ACE MF, PL research)*Data as on December 31, 2018

Market sentiments remained neutral in December, as crude oil prices and rupee stabilized, with global tensions easing. FIIs, which were selling Indian equities over the past few months, were net buyers. State elections, which were expected to enhance volatility, remained a benign event in the eyes of the market.

While the long-term positives remain intact, the following factors will affect the market going ahead:

FISCAL DEFICIT HITS 115% OF BUDGET ESTIMATES

Several experts, including rating agencies like Moody's and India Ratings, had highlighted the concern that India may not meet its fiscal deficit target due to a shortfall in revenues. The government fell short on indirect taxes and non-tax revenues, and may fall short by Rs 10,000 cr of the disinvestment target. The fiscal deficit for the period of April-November was Rs 6.24 lakh crore, at 114.8% of the Budget estimates.

EARNINGS DOWNGRADE A KEY RISK

The critical factor in delivering durable equity returns depends on the revival of earnings growth, which at a broad level has been elusive in the last 4-5 years. Analysts have downgraded FY19 & FY20 earnings for many top stocks. Out of the S&P BSE 200 constituents as many as 68% faced an earnings downgrade, while just 29% enjoyed an upgrade in EPS for FY19. Q2 earnings led to more disappointments than positive surprises. Going ahead, the growth drivers are likely to change, which could create a disruption in earnings. A change in the direction of crude oil and depreciation of the rupee has changed the narrative for earnings growth going ahead.

GEOPOLITICAL EVENTS

From the beginning of 2019, India has witnessed a huge positive change, with crude oil prices receding and rupee appreciating. Global growth is witnessing some disruptions and the US Fed's rate policy and global bond yields will be closely watched. Turbulence for global markets may emerge due to Brexit, and from Italy, Turkey and the Middle East.

POLITICAL UNCERTAINTY

With the State Elections out of the way, all eyes are now on the General Elections and the steps to current government is likely to take in order to win back voters. The outcome of the State Assembly Elections did not spook the markets early in December. The Modi-led BJP government remains the favorite for the general elections. Yet, there is a possibility of a disruption, which the markets have not ruled out.

FUND HOUSE VIEWS ON THE EQUITY MARKET

AFTER INTERACTING WITH MULTIPLE FUND HOUSES, WE HAVE CONSOLIDATED AND SUMMARISED THEIR VIEW ON THE EQUITY MARKET AS BELOW:

SHORT-TO-MEDIUM TERM RISKS EASING

Crude oil prices and the rupee continue to remain in a favourable zone, providing a relief to the market. Benchmark interest rates, which were projected to be hiked in the coming months, is likely to remain unchanged till the end of the fiscal year. With easing inflation, a possibility of a rate cut is also on the cards. Though crude oil prices and the rupee are expected to remain subdued, any global upset could create volatility.

MID-CAP AND SMALL-CAP STOCKS BEGINNING TO LOOK ATTRACTIVE

The mid-cap and small-cap indices have corrected significantly over the past year and are beginning to show some green shoots. Though the Nifty 50 has generated a positive return of 6% over 1-year, the Nifty Midcap and Nifty Smallcap are down 12% and 28% each. On looking at past data, a divergent performance has often led to a sharp recovery in Midcap and Smallcap stocks in the following months. At the current levels, the mid and small-cap indices seem well-poised for another such recovery.

ELECTION YEARS ARE OFTEN VERY VOLATILE

Election years often tend to be extremely volatile for the market. This has especially been the case for the market in the last three general elections. Given the surprise election results in the State Assembly Elections, the general elections will be a close fight. A hung parliament may send the market in a tizzy, while a majority government with either party should be a positive for the market.

SENSEX VALUATIONS ABOVE FAIR VALUE

The Indian markets are higher than most peers in terms of valuations. The forward price-to-earnings (P/E) of the S&P BSE Sensex is just short of Japan’s Nikkei 225, but higher than the benchmark indices of Hong Kong, China, Brazil and other developed market indices. Valuations had cooled-off in the month earlier, but are on the rise once again. In such markets, when there are several risks at play, it is best to approach the market with caution and shift from a large-cap bias to a multi-cap bias

THREAT TO NEAR-TERM GROWTH

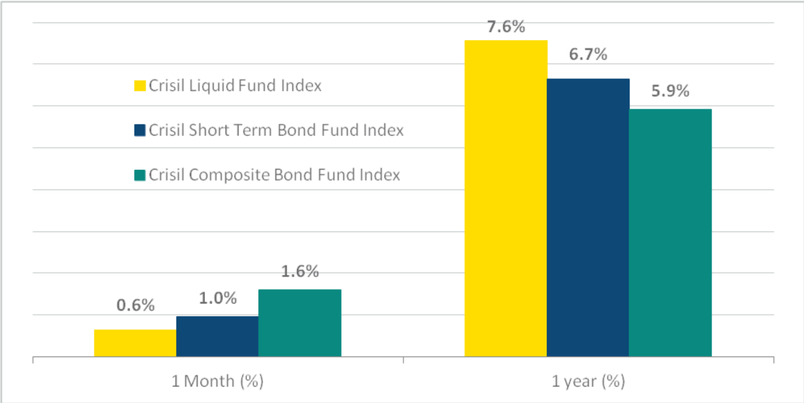
Over the past few months, private vehicle sales have slowed. This has added on to the already weak rural wage growth. Auto volumes have moderated, with the near-term demand trajectory also appearing slightly uncertain due to the rising cost of ownership. However, steel consumption growth has held up well. Domestic demand indicators remain under pressure because of an unfavorable base effect from GST and delayed festive season this year. Though demand indicators are mixed, investment indicators and nascent recovery in private CAPEX continue to bode well for the broader recovery in the economy

PEAKED OUT NPA CYCLE

The worst of the NPA crisis that has troubled banks seems to be over, and credit growth is seeping back, as per RBI reports. The share of gross NPAs in total advances of banks, both in the public and private sector, peaked in March 2018, and has since declined — in both the June and September quarter of the current fiscal year. The NPA crisis is more widespread in the public sector banks. The ‘twin balance sheet’ problem, where banks were unable to lend due their bad loans and companies were unable to borrow under the burden existing loans, seems to be easing.

DEBT MARKET OUTLOOK

The 10-year benchmark G-Sec yield eased further from around 7.5% at the beginning of the month, to under 7.5% at present. This is the lowest yield since April this year.



(Source: ACE MF, PL research)*Data as on December 31, 2018

Once again, funds investing at the longer end of the yield curve benefited over the past month and have recovered some of the losses of the previous months. But given the volatile rate environment over the past year, the Liquid Fund index continues to lead with a return of 7.6%, while the Short-term and Composite Bond Fund Index trail with returns of 6.7% and 5.9% each.

Going ahead, the debt market will be affected by the following factors:

UPSIDE RISKS TO INFLATION EASE

The RBI Monetary Policy Committee (MPC) kept the benchmark repo rate unchanged at 6.5% and retained the stance of a calibrated tightening. However, a Reuter consensus survey of economists indicates that a rate hike may be off the cards till the end of the fiscal year. Inflation cooled off to its lowest since June 2017 and has remained below the RBI's estimates in recent months. The RBI now expects inflation to remain between 2.7%-3.2% for the second half of the year. This is within the flexible inflation target of 4% (+/-2%) set by the MPC.

LIQUIDITY IMPROVING

To alleviate liquidity conditions, the RBI conducted OMOs aggregating to Rs 40,000 crore in November 2018. Systemic liquidity during November 2018 remained negative and closed at negative Rs 44,600 crores versus negative Rs 87,300 crores at the beginning of the month. The Central Bank further announced another round of OMOs in December 2018, while indicating that the OMOs may continue till the end of the financial year. As a result, banking liquidity has improved and G-Sec yields too, have declined considerably.

CONCERNS REGARDING NBFC REFINANCE MAY BE ABATING

Post the IL&FS crisis, investors were concerned that NBFCs may find it difficult to refinance and they would likely default. However, over the past couple of months, NBFCs have been able to refinance their maturities. Many NBFCs have now started to reduce their short-term borrowings as a percentage of their total borrowings. Most NBFCs have been correcting their Asset-Liability-Mismatch by issuing lesser amount of commercial papers and higher amount of NCDs. Credit spreads have widened leading to good investment opportunities.

FUND HOUSE VIEWS ON THE DEBT MARKET

AFTER MEETING MULTIPLE FUND HOUSES, WE HAVE CONSOLIDATED AND SUMMARISED THEIR VIEW ON THE DEBT MARKET AS BELOW:

RATE HIKES PUSHED BACK

The market was in expectation of two rate hikes in FY2019 just over a month back. However, with crude oil prices correcting, the rupee stabilizing, and inflation staying low, expectations of a rate hike have been pushed back to the next financial year. As expected, the RBI held the benchmark repo rate at 6.5%, but maintained its stance of calibrated tightening. The RBI will be closely watching inflation, and given the current trend, it is likely to hold interest rates in its 6th Bi-monthly Policy, to be announced on February 7, 2019. This is a positive for long-term yields.

RBI OMO PROGRAM TO SUPPORT LONGER TERM BONDS

Funds houses expect G-Sec's to trade with a positive bias, as rate hikes have already been priced in, and RBI's commitment to provide durable liquidity through OMOs. To ease liquidity conditions, RBI conducted OMO purchase of Rs36,000 crore in October 2018 and Rs 40,000 crore in November. The RBI further announced another round OMOs amounting to Rs 40,000 crore for December. Hence, yields could move lower as liquidity in the system increases.

A SHIFT TO HIGHER DURATION

As rate hikes are unlikely in the short-to-medium term, the yield curve has been flattening out and fund houses are increasing the duration in their portfolios. Yet, on the cautious side, one can stick to low duration schemes. Those willing to take on additional risk can invest in dynamic duration schemes, which are expected to outperform in the medium term.

TACTICAL ASSET ALLOCATION

WHAT IS TACTICAL ASSET ALLOCATION?

- Tactical asset allocation, maintains a mix of equity and debt, but is focused on taking a more active approach of positioning a portfolio into asset classes or sub-categories of asset classes that have the most potential for gains

- A tactical approach involves making a judgment call on where the economy and the financial markets may be headed

- Tactical allocation also involves shifting allocations within an asset class. For example, an equity portion of a portfolio may be shifted to include more small-cap stocks, more large-cap stocks, or other areas where there is a short-term opportunity

- Take for example an investors willing to accept more risk in their asset allocation, the traditional aggressive or moderately aggressive investor would be very aggressively positioned at market bottoms, when stock valuations are low

- Such tactical shifts in allocation provides as investors with the opportunity to earn higher returns with a marginal increase in risk

TACTICAL VIEW: THE IDEAL STRATEGY

AS THERE HAS BEEN NO SIGNIFICANT CHANGE IN FUND MANAGER OUTLOOK, WE MAINTAIN THE SAME TACTICAL VIEW AS LAST MONTH

EQUITY INVESTMENTS

- Preference should be towards large caps funds. Multi-cap funds with a large-cap bias can also be considered

- Mid Cap & Small Cap Funds have turned attractive, and invest through Systematic Investment Plans (SIPs) for the long term

- Asset allocation funds or equity-oriented Hybrid Funds are best suited to ride out the market volatility

- Very aggressive investors can opt for Sector Funds in the Pharma and Consumption space.

DEBT INVESTMENTS

- Stick to Low Duration and Short Duration Funds to deal with the market volatility

- Debt schemes, such as Floater Funds, with an accrual strategy will help capture the current elevated yields

- Dynamic Bond Funds can help position the duration of the portfolio to benefit from the volatility in the debt market over the medium term

- Credit Risk funds offer investors with the opportunity to earn a higher return as compared to similar funds with the same duration

.

MODEL PORTFOLIOS BASED ON TACTICAL VIEW

Based on the market outlook, we have put together three model portfolio's based on the investor's risk profile. You may invest in the suggested schemes in the recommended allocation.

AGGRESSIVE RISK PORTFOLIO

This portfolio is suitable for those investors who are seeking long-term capital growth. The portfolio is invested in equity mutual funds, with the potential to deliver superior long-term returns. The ideal investment horizon is 3-5 years or more.

TOTAL EQUITY EXPOSURE: 90%

TOTAL DEBT EXPOSURE: 10%

SUGGESTED ALLOCATION

Scheme Category	Allocation (%)
Large Cap Funds	**50%**
Mid Cap Funds	**20%**
Sector Funds	**20%**
Dynamic Bond Funds	**10%**

SUGGESTED PORTFOLIO WITH THE TOP RATED FUNDS

Category Name	Scheme Name	Alloc (%)	1-Month (%)	1-Year (%)	3-Year (%)	Fund Manager
Large Cap	Axis Bluechip Fund	20	-0.48	4.97	14.32	Shreyash Devalkar
	UTI Mastershare	20	0.56	-2.19	12.11	Swati Kulkarni
	ICICI Pru Bluechip Fund	10	0.72	-1.87	14.76	Sankaran Naren
Mid Cap	Axis Midcap Fund	10	-0.09	0.66	14.09	Shreyash Devalkar
	HDFC Mid-Cap Opportunities	10	0.52	-13.76	14.30	Chirag Setalvad
