SECTION II – RISK FACTORS

An investment in the Equity Shares involves a high degree of risk. You should carefully consider all of the information in this Red Herring Prospectus, including the risks and uncertainties described below and the restated Financial Statements incorporated in this Red Herring Prospectus, before making an investment in the Equity Shares. Bidders should pay particular attention to the fact that we are governed in India by a legal and regulatory environment which in some material respects may be different from that which prevails in other countries. In making an investment decision, Bidders must rely on their own examination of our Company and the terms of the Issue, including the risks involved. If any or some combination of the following risks occur or if any of the risks that are currently not known or deemed to be not relevant or material now, actually occur, our business, prospects, financial condition and results of operations could suffer, the trading price of the Equity Shares could decline, and you may lose all or part of your investment. For further details, please refer to chapters titled “Business Overview” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” beginning on pages 129 and 263, respectively of this Red Herring Prospectus, as well as the other financial and statistical information contained in this Red Herring Prospectus. If our business, results of operations or financial condition suffers, the price of the Equity Shares and the value of your investments therein could decline.

We have described the risks and uncertainties that our management believes are material, but these risks and uncertainties may not be the only ones we face. Additional risks and uncertainties, including those we are not aware of, or deem immaterial or irrelevant, may also result in decreased revenues, increased expenses or other events that could result in a decline in the value of the Equity Shares. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial or other implication of any of the risks described in this section. You should not invest in this Issue unless you are prepared to accept the risk of losing all or part of your investment, and you should consult your tax, financial and legal advisors about the particular consequences to you of an investment in the Equity Shares.

This Red Herring Prospectus also contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Red Herring Prospectus. For further details, please refer to chapter titled “Forward-Looking Statements” beginning on page 16 of this Red Herring Prospectus.

Unless otherwise indicated, all financial information included herein are based on our restated Financial Statements. Please refer to the section titled “Financial Statements” beginning on page 194 of this Red Herring Prospectus.

INTERNAL RISK FACTORS

1. There is one tax proceeding involving our Company. An adverse outcome in the said tax proceeding may impact our future business, financial condition, results of operations and cash flows.

As on the date of this Red Herring Prospectus, we are involved in one tax proceeding, which is pending with the appropriate forum. We cannot assure you that the said tax proceeding will be decided in our favour. Decision in such tax proceeding may have an impact on our business, financial condition, results of operations and cash flows. In the event of any adverse outcome, we may be required to pay the disputed amount along with applicable interest and penalty and may also incur additional tax incidence going forward.

A summary of pending tax proceeding involving our Company is provided below:

(in Rs. Lakhs)

Particulars	Authority	Amount quantifiable
Income tax demand of A.Y. 2012-13*	CIT(A)	2.10
Total		2.10

*pertains to erstwhile M/s. Rajshree Industries

The amount claimed in the said tax proceeding has been disclosed to the extent ascertainable and includes amount claimed jointly and severally. If any new developments arise, such as a change in Indian law or rulings against us by appellate courts or tribunals, we may need to make provisions in our financial statements that could increase our expenses and current or long term liabilities or reduce our cash and bank balance. For further details, please refer to chapter on “*Outstanding Litigation and Material Developments*” beginning on page 289 of this Red Herring Prospectus.

2. Our Company is dependent on external suppliers for most of our machinery / component requirements and raw materials.

Our Company is dependent on external suppliers for most of our machinery / component requirements and raw materials. The failure of our suppliers to deliver these materials or components in the necessary quantities or to adhere to delivery schedules or specified quality standards / technical specifications, could adversely affect our business and our ability to deliver on time and at the desired level of quality giving rise to contractual penalties or liability, for failure to perform contracts, and a loss of customers and damage to our Company’s reputation, any of which could materially adversely affect its results of operations. Also, qualifying alternative suppliers that can meet our Company’s technical and quality standards, and who can supply these materials in necessary quantities, would entail substantial cost and could cause delays in deliveries of our Company’s products. Any of the foregoing could have a material adverse effect on the Company’s business, financial condition and results of operations.

3. The business of our Company is impacted by fluctuations in raw material prices, domestic and global.

The prices for our primary raw materials (including raw materials imported by our Company) used for the manufacture of plastic rigid sheets and thermoformed products have been volatile. The cost of raw material consumed represented 55.53%, 54.41% and 53.41% of our total revenues in Fiscal 2018, Fiscal 2017 and Fiscal 2016, respectively. These materials are global commodities and their prices are cyclical in nature and fluctuate in accordance with global market conditions. If the costs of these raw materials rises due to factors such as rise in input and commodity prices or shortages in supply, and our Company is not able to recover these costs through cost saving measures elsewhere or by increasing the prices of its products, our results of operations could be adversely affected. Further, our Company often purchases raw materials in advance based on our estimate of customer demand for an upcoming period. In the event prices for these raw materials subsequently decline there can be no assurance that our Company will be able to price our products based on the material costs it actually incurred.

4. A large part of our revenues is dependent on a limited number of customers. The loss of any of our major customers or a decrease in the volume of orders will materially and adversely affect our revenues and profitability.

At present, we derive most of our revenues from the orders received from limited number of customers. For the year ended March 31, 2018, our top ten (10) customers were contributing 54.89% of our total revenue. Our business and results of operations will be materially and adversely affected if we are unable to develop and maintain a continuing relationship with our key customers or develop and maintain

relationships with other new customers. The loss of a significant customer or a number of significant customers due to any reason will have material adverse effect on our business prospects and results of operations.

5. We rely on third-party transportation providers for all of our input materials and product distribution. Failure by any of our transportation providers to deliver our input materials and products on time or at all, could result in loss in sales.

We depend on third-party transportation to receive input materials required for our products and to deliver our finished products to our customers. However, we do not own any trucks or commercial vehicles and typically use third-party logistics providers for all of our product distribution and input materials procurement. This makes us dependent on such third-party transportation providers. Weather-related problems, strikes, or other events which affects third-party transportation could impair our ability to receive the raw materials and/or deliver the requisite quantities of products in time to our customers, which may result in cancellation or non-renewal of purchase orders, and could adversely affect the performance of our business, results of operations and cash flows. Additionally, if we lose one (1) or more of our transportation providers, we may not be able to obtain terms as favorable as those we receive from the third party transportation providers that we currently use, which in turn would increase our costs and thereby adversely affect our operating results. Whilst our Company has obtained goods in transit insurance policies, our transportation providers do not carry any such insurance coverage. There can be no assurance that we will receive compensation for any claims in a timely manner or at all, and consequently, any such loss may adversely affect our business, financial condition, results of operations and cash flows.

6. If there are delays or cost overruns in utilisation of Net Proceeds, our business, financial condition and results of operations will be materially and adversely affected.

The Net Proceeds are proposed to be utilised for construction of a new manufacturing facility and purchase and installation of machineries. Some of the machines proposed to be installed for setting up the new manufacturing facility are yet to be ordered. Our inability to construct the new manufacturing facility and purchase and installation of machineries in a timely and cost efficient manner will materially and adversely affect our business, financial condition and results of operations. For details of utilisation of Net Proceeds, please refer to chapter titled “*Objects of the Issue*” beginning on page 86 of this Red Herring Prospectus.

7. Any changes in laws restricting the manufacturing and the distribution of products in the plastic packaging industry could adversely affect the revenue and results of our operation.

Certain states in the territory of India have adopted/implemented laws on restricting the manufacture and/or sale of certain plastic and plastic products which effect the revenue and results of operations of the companies operating in plastic manufacturing industry.

The state of Maharashtra has on March 23, 2018 notified the Maharashtra Plastic and Thermocol Products (Manufacture, Usage, Sale, Transport, Handling and Storage) Notification, 2018, under which certain plastic products were banned from being manufactured and distributed in the state of Maharashtra. During the Fiscals 2018, 2017 and 2016 the contribution to the net revenue from operations of our Company from the sale of restricted products distributed in the state of Maharashtra was 2.31%, 2.88% and 1.61% respectively. Although the effect of the said notification has not materially impacted the Company, there can be no assurance that other states will not adopt/implement a similar restriction on manufacturing and distribution of plastic products and/or in the future include other plastic products in the restricted list, which may materially affect the revenue and the results of our operations.

- 8. We are dependent on a number of key personnel and services of the members of senior management and the loss of such persons, or our inability to attract and retain key personnel and senior management in the future, could adversely affect our business, growth prospects, results of operations and cash flows.**

Our ability to meet future business challenges depends on our ability to attract, recruit and retain talented and skilled personnel. We are highly dependent on our Promoters, our Directors, senior management and other key personnel to run and/or grow our business. Our management and technical personnel are supported by other skilled workers who benefit from regular in-house training initiatives. The loss of any of our Promoters, our Directors, senior management or other key personnel, or an inability to manage the attrition levels in different employee categories may materially and adversely impact our business, growth prospects, results of operations and cash flows.

We face competition to recruit and retain skilled staff. Due to the limited availability of skilled personnel, competition for senior management in our industry is intense. We may experience difficulties in attracting, recruiting and retaining an appropriate number of skilled staff for our business needs. We may also need to increase our pay structures to attract and retain such personnel. Our future performance will depend upon the continued services of these personnel's. As of June 30, 2018, we had four hundred and twenty seven (427) full time employees and sixty seven (67) contract employees. Our future success substantially depends on our ability to recruit, hire, motivate, develop, and retain talented and skilled personnel and our senior management. We believe that the inputs and experience of our senior management are valuable for the development of business and operations and the strategic directions taken by our Company. For details in relation to the experience of our Directors and key management personnel, please refer to chapter titled "*Our Management*" beginning on page 168 of this Red Herring Prospectus. There is no assurance, however, that these individuals or any other member of our senior management team will not leave us in the future. We cannot assure you that we will be able to retain these employees or find adequate replacements in a timely manner, or at all.

- 9. A significant number of properties, including our Registered Office and Corporate Office, warehouses, one (1) of our manufacturing facilities are not registered in our name and are taken on lease / leave & license. There can be no assurance that these lease / leave & license agreements will be renewed upon termination or that we will be able to obtain other premises on lease / rent on same or similar commercial terms.**

A significant number of properties, including our Registered Office and Corporate Office, warehouses, manufacturing facilities are not registered in our name and are taken on lease / leave & license / rent. In the event such leases / leave & license agreements are not renewed or are terminated, it could adversely affect our operations unless we arrange for similar premises. If we are unable to continue or renew such lease / leave & license agreements on same or similar terms, or find alternate premises on lease / rent on similar terms or at all, it may affect our business operations. For further details, please refer to chapter titled "*Business Overview*" beginning on page 129 of this Red Herring Prospectus.

- 10. The land on which the new manufacturing facility is proposed to be set up through the Net Proceeds is taken on lease by the Company.**

The land on which the new manufacturing facility is proposed to be set up through the Net Proceeds is taken on lease by the Company. If the Company is unable to renew the lease on favourable terms or at all or if the lease is terminated by the Lessor, it may adversely impact our business, financial performance and operations. For details, please refer to the chapter titled "*Business Overview*" beginning on page 129 of this Red Herring Prospectus.

11. Reduction in exports of the products of our Company may affect the business and results of operation of our Company.

Reduction in exports of the products of our Company may affect the business and results of operation of our Company. Any change in the regulatory environment or economic condition of any of the countries that we are exporting to or reduction in the demand of our products may affect the business and results of operation of our Company.

12. Work stoppages, shortage of labor and other labor related problems could adversely affect our business, and our operations are dependent on a pool of contract labor and an inability to access adequate contract labor at reasonable costs at our manufacturing facilities may adversely affect our business prospects and results of operations.

As of June 30, 2018, we had four hundred and twenty seven (427) full time employees and sixty seven (67) contract employees. We employ a large number of laborers. If we are unable to negotiate with the labor contractors or if there is any shortage or disruption in the availability of labor, it could result in work stoppages or increased operating costs as a result of higher than anticipated wages or benefits. Further, India has stringent labor legislation that protects the interests of workers, including legislation that sets forth detailed procedures for establishment of unions, dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon their retrenchment. There can be no assurance that we will have adequate access to skilled workers at reasonable rates and in the area in which we operate. As a result, we may be required to incur additional costs to ensure timely execution of our customer orders. This may in turn affect our results of operations.

13. The trademarks used by us are not owned by us. Our ability to use our intellectual property including our logo may be impaired.

The trademarks “SAMRAT” (owned by M/s Bobson Industries) and “NATRAJ” and “SATYAM” (owned by M/s S. R. Plastics), that are currently used by our Company are licensed to our Company till February 28, 2022. In the event the said licenses are not renewed in time, this may adversely affect our business, financial condition and results of operations.

Further, as on the date of this Red Herring Prospectus, we have applied for registration for our Company’s device i.e. “RPPL” under class 16. Pending registration, we do not enjoy the statutory protection accorded to a registered trademark. There can be no assurance that our application will succeed. Grounds for refusal of registration may include the validity or scope of the application. If we are unable to obtain a registration, we may still continue to use the Company’s device but the same would remain vulnerable to infringement and passing-off by third parties and will not be able to enforce any rights against them. We may also need to change our Company’s device which may adversely affect our reputation and business and could require us to incur additional costs. Further, our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. This may lead to litigations and any such litigations could be time consuming and costly and their outcome cannot be guaranteed. Our Company may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property, which may adversely affect our business, financial condition and results of operations. For details, please refer to chapter titled “*Government and Other Statutory Approvals*” beginning on page 293 of this Red Herring Prospectus.

14. Our Company has not complied with certain statutory provisions under various laws. Such non-compliance / lapses may attract certain penalties.

Our Company has not complied with certain statutory provisions such as inadvertent delay in filing / non – filing of certain forms with some government authorities and/or inadvertent errors in filing of forms with RoC. Further, our Company is required to make filings under various rules and regulations as applicable under the Companies Act and under the applicable provisions of the Companies Act, 1956 which is usually done within the prescribed time period by the Company. However in some instances delay has occurred in making RoC filings. Due to these delays in filings, our Company had, on some occasions, paid the requisite late fees.

No show cause notice in respect of the above has been received by the Company till date, however any penalty imposed for such non-compliance in future by any regulatory authority could affect our financial conditions to that extent. Any delay / non-compliance in the past or future may render us liable to statutory penalties / actions.

15. We have in the past entered into related party transactions and may continue to do so in the future.

Our Company has entered into certain transactions with our Promoters, Promoter Group and Directors. While we believe that all such transactions are conducted at arm’s length basis, there can be no assurance that we could not have achieved more favourable terms had such transactions not being entered into with related parties. Furthermore, it is likely that we will enter into related party transactions in future. There can be no assurance that such transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operations. For details on the related party transactions entered into by our Company, please refer to chapter titled “*Related Party Transactions*” on page 191 of this Red Herring Prospectus.

16. Our failure to comply with financial and other restrictive covenants imposed on us under our financing arrangements may adversely affect our ability to conduct our business and operations.

Our aggregate secured borrowings from term loans and working capital facilities as on August 7, 2018 from banks was Rs. 2,067.06 Lakhs including bank guarantees amounting to Rs. 49.43 Lakhs (out of which an outstanding bank guarantee of Rs. 21.43 Lakhs is as on July 31, 2018). The arrangements in respect of some of the debt facilities contain certain covenants such as maintenance of financial ratios, compliance with reporting requirements and other restrictions which may significantly limit our ability to borrow additional money, make capital expenditure and investments etc. There can be no assurance that we will be able to comply with these covenants in the future or that we will be able to obtain the lenders’ consents necessary to take the actions that may be necessary.

Our existing debt or additional debt that we may raise has, or may have, among others, the following consequences:

- limiting our ability to fund future working capital requirements, capital expenditures, etc;
- requiring us to dedicate a substantial portion of our cash flow from operations to service our debt;
- limiting our flexibility to react to changes in our business and in the industry in which we operate;
- placing us at a competitive disadvantage with respect to any of our competitors who have less debt;
- requiring us to meet additional financial covenants; and
- leading to circumstances that may result in an event of default, if not waived or cured.

Any failure to service our indebtedness, perform any condition or covenant or comply with the restrictive covenants could lead to a termination of one or more of our credit facilities, acceleration of amounts due under such facilities, affect our ability to raise additional funds or renew borrowings to finance our existing working capital requirements and pursue our growth initiatives. We cannot provide any assurance

that our business will generate sufficient cash to enable us to service our debt or to fund our other liquidity needs as they become due. The termination of, or declaration or enforcement of default under, any financing arrangement may have an adverse effect on our business, financial condition, results of operations and prospects. For details of our indebtedness, please refer to chapter titled “*Financial Indebtedness*” beginning on page 283 of this Red Herring Prospectus.

17. Our Company has no formal supply agreement or contract with our vendors/suppliers for the uninterrupted supply of major raw materials.

Our business may be adversely affected if there is any disruption in the supply of raw material. We do not have any formal agreements with our vendors/suppliers as we operate on a purchase order system. Due to the absence of any formal contract with our vendors/suppliers, we are exposed to the risks of irregular supplies or no supplies at all or delayed supplies which may materially affect our results of operations. In the event of any disruption in the supply of raw materials or the non availability of raw materials, the production and dispatch schedule may be adversely affected, thereby impacting the sales and profitability of the Company.

18. Our movable and immovable properties are hypothecated / mortgaged with the lenders to provide security in respect of finance availed by us.

We have secured our lenders by creating a charge over our movable and immovable properties in respect of loans / facilities availed by us. The total amounts outstanding and payable by us as secured loans were 2,125.85 Lakhs as on August 7, 2018 including bank guarantees amounting to Rs. 49.43 Lakhs (out of which an outstanding bank guarantee of Rs. 21.43 Lakhs is as on July 31, 2018). In the event we default in repayment of the loans / facilities availed by us and any interest thereof, our properties may be possessed by lenders, which in turn could have significant adverse affect on business, financial condition or results of operations. For further details please refer to chapter titled “*Financial Indebtedness*” beginning on page 283 of this Red Herring Prospectus.

19. We require certain approvals and licenses in the ordinary course of business and are required to comply with certain rules and regulations to operate our business, and the failure to obtain, retain and renew such approvals and licences or comply with such rules and regulations, and the failure to obtain or retain them in a timely manner or at all may adversely affect our operations.

We require several statutory and regulatory permits, licenses and approvals to operate our business. Many of these approvals are granted for fixed period of time and need renewal from time to time. Non-renewal of the said permits and licenses would adversely affect our Company’s operations, thereby having a material adverse effect on our business, results of operations and financial condition. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all. Further, some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to comply with such conditions, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business. If we fail to comply with all applicable regulations or if the regulations governing our business change, we may incur increased costs, be subject to penalties or suffer a disruption in our business activities, any of which could adversely affect our results of operations. For further details, please refer to chapters titled “*Key Industry Regulations and Policies*” and “*Government and Other Statutory Approvals*” beginning on pages 152 and 293 respectively of this Red Herring Prospectus. Our Company proposes to use part of its Net Proceeds to set up a new manufacturing facility, which will

require certain regulatory permits, licenses and approvals from government authorities. Any delay in applying for or obtaining such permits, licenses and approvals may adversely affect our Company's operations, thereby having a material adverse effect on our business, results of operations and financial condition.

20. Our Company does not have any similar and comparable listed peer which is involved in the same line of business for a direct comparison of performance and therefore, investors must rely on their own examination of accounting ratios of our Company for the purposes of investment in the Issue.

As on the date of this Red Herring Prospectus, we believe that none of the listed companies in India have a business profile and revenue streams alongwith their size, directly comparable to our Company. However, there is a listed company in India in the rigid plastic sheets / thermoformed packaging products sector with one or more business segments that maybe common to our business. Since the listed company may not be directly comparable to our Company, the accounting ratios of the same may not be a representative yardstick for our Company. Further, it maybe noted that one listed company may not be sufficient or be able to reflect or represent the performance of the entire rigid plastic sheets and thermoformed packaging products industry. Therefore, investors must rely on their own examination of our Company for subscribing to the Issue.

21. Our business requires significant investments in plant and machinery, moulds & dies and regular technological upgrades.

Our business requires significant investments in plant and machinery, moulds & dies and regular technological upgrades. Whilst we aim to stay upgraded with the state of the art machinery and technology there can be no assurances that our Company will be able to do so in future. Further, our Company is dependent on maintaining our manufacturing facilities in good working condition and inability to do so will adversely impact our business, financial performance and operations.

22. Some of our Promoters have interests in other ventures.

Some of our Promoters have interests in other ventures (i.e. partnership firms / HUF / body corporate) which are in similar line of business as our Company. Any diversion of business pertaining to plain products of our Company to such other ventures may adversely impact our business, financial performance and operations.

Further, any default in discharging financial obligations in their capacity as partners in any of the partnership firm(s) and/or the partnership firms and/or partners breach provisions of any applicable laws resulting in any enforcement of any security interest or imposition of penalty or disqualification is likely to be directly or indirectly extended onto the promoters of our Company, which may adversely affect business, financial performance and operations of our Company.

23. The deployment of funds raised through this Issue shall not be subject to any monitoring agency and shall be purely dependent on the discretion of the management of our Company.

Since the Issue size is less than Rs. 10,000 Lakhs, there is no mandatory requirement of appointing an independent monitoring agency for overseeing the deployment of utilization of funds raised through this Issue. Therefore, the deployment of these funds raised through this Issue is at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financial results.

24. Breakdown of machinery and / or equipment used for the purpose of manufacturing process.

Any breakdown or defect in the machinery and / or the equipment used for the purpose of our manufacturing processes, may delay the production process as a whole and result in missing deadlines in delivery of product if we are unable to repair the machines or replace it within relevant timelines. Any such delays may have an adverse effect on the business of the Company.

25. Any change in environment laws and regulations may adversely affect our business operations.

Our Company is regulated under certain environment protection laws and other regulations including Maharashtra Non-Biodegradable Garbage (Control) Act, 2006, Maharashtra Plastic and Thermocol Products (Manufacture, Usage, Sale, Transport, Handling and Storage) Notification, 2018 and Plastic Waste Management Rules 2016 as may be amended from time to time. The government and regulatory authorities are constantly amending the rules and regulations for manufacturing, usage, transportation, distribution, wholesale and retail sale and storage of various forms of plastic and handling of non-biodegradable plastic waste due to which, the government and regulatory authorities may introduce or amend some act, rule, and regulation which may affect our Company and the industry in which we operate, directly or indirectly. Any failure to comply with the same or any inability to meet the regulatory requirements may adversely impact our business, growth prospects, results of operations and cash flows.

26. Our Company has experienced negative cash flows in some prior periods and may do so in the future, which could have a material adverse effect on our business, prospects, financial condition, cash flows and results of operations.

Our Company has experienced negative net cash flows in some previous periods, the details of which are provided below:

(Amount in Rs. Lakhs)

Particulars	Net increase/ (decrease) in cash and cash equivalents
2018	28.19
2017	(763.16)
2016	493.43
2015	289.42
2014	(636.39)

For details on the cash flows for the last five Fiscals, please refer the section titled “Financial Statements” on page 194 of this Red Herring Prospectus. We may incur negative cash flows in the future which may have a material adverse effect on our business, prospects, results of operations and financial condition.

27. Certain agreements may not be adequately stamped or may not have been registered as a result of which our operations may be impaired.

Few of our agreements may not be adequately stamped or registered. The effect of inadequate stamping is that the document may not be admissible as evidence in legal proceedings and parties to that agreement may not be able to legally enforce the same, except after paying a penalty for inadequate stamping. The effect of non-registration, in certain cases, may make the document inadmissible in legal proceedings. Any potential dispute vis-à-vis non-compliance of local laws relating to stamp duty and registration may adversely impact the continuity of our business activity.

28. We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.

Employee misconduct or errors could expose us to business risks or losses, including serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

29. We cannot guarantee the accuracy or completeness of the facts and other statistics with respect to India, the Indian economy and rigid plastic sheets and thermoformed packaging sector contained in this Red Herring Prospectus.

While facts and other statistics in this Red Herring Prospectus relating to India, the Indian economy and the rigid plastic sheets and thermoformed packaging sector have been based on various government publications and reports from government agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us, the BRLM or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled “*Industry Overview*” beginning on page 105 of this Red Herring Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

30. Certain sections of this Red Herring Prospectus disclose information from an industry report commissioned by our Company and any reliance on such information for making an investment decision in the Issue is subject to inherent risks.

We have retained the services of an independent third party research agency, CARE Advisory, to prepare CARE Advisory Report, July 2018, excerpts from which have been included in this Red Herring Prospectus. The CARE Advisory Report, July 2018 is subject to various limitations and based upon certain assumptions that are subjective in nature. There can be no assurance that the assumptions adopted by this third party agency for the purposes of preparing its research report will prove to be accurate. If any of these assumptions are incorrect, the understanding of the PET, PP, HIPS and Thermoformed Packaging Products could be materially different from that set forth in the said report. While we have taken reasonable care in the reproduction of relevant information, industry facts and other statistics have not been prepared or independently verified by us, BRLM or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness

31. Our Company has allotted certain Equity Shares under Pre-IPO Placement at a price that may be lower than the Issue Price.

Our Company has allotted 2,97,939 Equity Shares under Pre-IPO Placement at a price of Rs. 120 per Equity Share that may be lower than the Issue Price within the last twelve (12) months from the date of the Red Herring Prospectus.

32. We cannot assure you that the deployment of the Net Proceeds of the Issue in the manner intended by us will result in increase in the value of your investment.

We intend to primarily use the Net Proceeds of the Issue as described under chapter titled “*Objects of the Issue*” beginning on page 86 of this Red Herring Prospectus. Our funding requirements and the deployment of the Net Proceeds of the Issue are based on management estimates and have not been appraised by any bank, financial institution or other independent agency. In response to the dynamic nature of our business, our management will have broad discretion to revise our business plans, estimates and budgets from time to time. Consequently, our funding requirements and deployment of funds may change, which may result in rescheduling of the proposed utilization of the Net Proceeds of the Issue and increasing or decreasing expenditure for a particular activity, subject to compliance with applicable law and the investment policies approved by our management.

Further, pursuant to section 27 of the Companies Act any variation in the objects for which the Prospectus will be issued would require a special resolution of the shareholders and the promoter or controlling shareholders will be required to provide an exit opportunity to the shareholders who do not agree to such proposal to vary the objects in accordance with Chapter VI-A of the SEBI ICDR Regulations. In the event of any such variation in the objects, the Promoters or controlling shareholders will provide an exit opportunity to such dissenting shareholders in accordance with the applicable provisions of SEBI ICDR Regulations.

Further, pending utilization of the Net Proceeds of the Issue, we are required to deposit the Net Proceeds of the Issue for any interim period only in scheduled commercial banks listed under Schedule II of the Banking Regulation Act, 1949. We cannot assure you that we will earn significant interest income on such deposits.

33. The success of the products manufactured by us depends on the success of the end product of our customer. Reduction in sales of the products of our customer, or defects in our customer’s products which may be attributable to us, may adversely affect our business, financial condition, results of operations and prospects.

The success of our business depends on the growth in the business of our customers. The production and sales volumes of our customers may be affected by a number of factors such as change in economic or industry conditions, change in regulatory requirements, government initiatives, products becoming obsolete or being phased out. Any decline in the demand for our customer’s products may adversely affect the sales of our products to our customers and in turn may adversely affect our business, financial condition, results of operations and prospects. Further, defects in our customer’s products, which may be attributable to us, directly or indirectly, may also adversely affect our financial condition and prospects.

34. Activities involving our manufacturing processes can be potentially dangerous and can cause injury to people or property in certain circumstances. A significant disruption at our manufacturing facilities may adversely affect our production schedules, costs, revenues and ability to meet customer demands.

Our business involves manufacturing processes that can be potentially dangerous to our employees. We have faced past instances of accidents suffered by our employees in our manufacturing facility, while discharging their duties. An accident may result in injury to employees or loss of life, damage / destruction of property or equipment, manufacturing or delivery delays, suspension of our operations and / or imposition of liabilities.

Interruptions in production as a result of an accident may also increase our costs and reduce our revenue, and may require us to make substantial capital expenditures to remedy the situation or to defend litigation that we or our senior management may become involved in, which may consequently have a negative effect on our profitability, business, financial condition, results of operations and prospects. Any negative

publicity associated therewith, may have a negative effect on our business, financial condition, results of operations and prospects.

35. Our business operations may be disrupted by an interruption in power supply, which may impact our business operations.

Our manufacturing facilities require constant power supply and any disruption in the supply of power may disrupt our operations, which may interfere with manufacturing process requiring us to either stop our operations or repeat activities which may involve additional time and increase our costs. While we believe, we have adequate stand by power supply, this may not be adequate if the disruption in the supply of the power is for a longer period.

36. We may face competition from competitors that may have greater financial and marketing resources. Failure to compete effectively may have an adverse impact on our business and results of operations.

We compete directly and indirectly with other manufacturers and suppliers of rigid plastic sheets and thermoformed packaging products. Increased competition may force us to improve our service capabilities or lower our prices or result in loss of customers, which may adversely affect our profitability and market share. Some of our competitors may have greater capital, marketing, technological and other resources, which may enable them to commit larger amounts of capital in response to changing market conditions, or to achieve substantially more market penetration in certain segments of those markets in which we operate or to anticipate the course of market developments and trends more effectively than we do and develop capabilities that may render our processes obsolete or put us at a disadvantage. We may also face competition from new entrants in the market as well as aggressive pricing and marketing strategies by other manufacturers trying to gain market share. Any exclusive arrangements between suppliers of raw materials and our competitors may also increase our operating costs.

We believe that it is difficult to predict how the competitive landscape of our industry will develop over the long term. General competitive factors in the market, which may affect the level of competition over the short and medium term, include time to market, quality, price, timely delivery, warranty and general customer experience.

37. Our insurance coverage may not adequately protect us from all material risks and liabilities.

We maintain insurance which we believe is typical in our industry in India and for amounts which we believe to be commercially appropriate for risks. However, such insurance may not be adequate to cover all our losses or liabilities that may arise from our operations. Our insurance policies contain exclusions and or all limitations on coverage, as a result of which, we may not be able to successfully assert our claims for any liability or loss under the said insurance policies. Additionally, there may be various other risks and losses, specially arising out of our business agreements, for which we are not insured because such risks are either uninsurable or not insurable on commercially acceptable terms. Furthermore, there can be no assurance that in the future we will be able to maintain insurance of the types or at levels which we deem necessary or adequate or at premiums which we deem to be commercially acceptable.

The occurrence of an event for which we are not insured, where the loss is in excess of insured limits or where we are unable to successfully assert insurance claims for losses, could result in unforeseen liabilities and losses. Further, despite such unforeseen losses we may remain obligated for any future financial indebtedness or other obligations related to our business. Any such unforeseen losses or liabilities could result in an adverse effect on our business operations, financial conditions and results of operations.

38. Some of our Directors have interests other than reimbursement of expenses incurred and normal remuneration or benefits in our Company.

Our Directors namely, Ramswaroop Radheshyam Thard and Naresh Radheshyam Thard are interested in our Company to the extent of the Equity Shares held by them in the Company, and any dividends, bonuses or other distributions on such Equity Shares. For details, refer chapters titled “*Our Management*”, “*Our Promoter and Promoter Group*” and section titled “*Financial Statements*” beginning on pages 168, 184 and 194 of this Red Herring Prospectus, respectively.

39. Our ability to pay dividends in the future will depend, inter alia, upon available financial resources, investment requirements and taking into account optimal shareholder returns.

Our ability to pay dividends to our shareholders in the future will depend, inter alia, upon available financial resources, investment requirements and taking into account optimal shareholder returns. For details of the dividends paid by our Company, in the last five (5) Financial Years please refer to chapter titled “*Dividend Policy*” on page 192 of this Red Herring Prospectus. The amounts paid as dividends in the past are not necessarily indicative of the dividend policy of our Company or dividend amounts, if any, in the future. There is no guarantee that any dividend will be declared or paid or that the amount thereof will not be decreased in the future.

40. Our Promoters and Promoter Group will continue to hold majority shareholding after the completion of the Issue.

After completion of the Issue, our Promoters and members of the Promoter Group will collectively own a majority of our equity share capital. As a result, our Promoters, together with the members of the Promoter Group, will continue to exercise a significant degree of influence over us and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act and our AOA. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company. In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or minority shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

41. Significant differences exist between Indian GAAP and Ind AS and other accounting principles, such as IFRS and U.S. GAAP, which may be material to investors’ assessments of our financial condition, result of operations and cash flows.

Our Financial Statements for Fiscals 2018, 2017, 2016, 2015 and 2014 included in this Red Herring Prospectus are prepared and presented in conformity with Indian GAAP, and in each case, restated in accordance with the requirements of section 26 of the Companies Act read with rule 4 of Companies (Prospectus and Allotment of Securities) Rules 2014, as amended, the SEBI ICDR Regulations and the Guidance Note on “Reports in Company Prospectus (Revised 2016)” issued by the ICAI. Indian GAAP differs from Ind AS and other accounting principles with which prospective investors may be familiar in other countries, such as IFRS and U.S. GAAP. Accordingly, the degree to which the Financial Statements included in this Red Herring Prospectus will provide meaningful information is entirely dependent on the reader’s level of familiarity with Indian GAAP.

42. Changes in currency exchange rates influence our results of operations.

Changes in currency exchange rates influence our results of operations. We have imported and intend to import some of our machineries / spare parts and raw materials and also export our products which are denominated in foreign currencies, primarily in USD, CHF and Euro. Because of our foreign currency exposures, exchange rate fluctuations between the Indian Rupee and foreign currencies, especially the USD, CHF and Euro, can have a material impact on our results of operations, cash flows and financial condition. The exchange rate between the Indian Rupee and USD/CHF/ Euro has been volatile in recent periods. We have certain foreign currency loans which have been hedged partially, but this may not give complete protection from the foreign currency exposure on interest or repayment of such loans.

43. Fluctuations in interest rates may impact our results of operations.

Our exposure to interest rate risks primarily relates to our debt. Fluctuations in interest rates could negatively affect the amount of interest payable by us under our debt obligations and could make it more difficult for us to procure new debt on attractive terms.

EXTERNAL RISK FACTORS

44. General economic conditions and other factors that are beyond the control of our Company in India and globally could adversely affect the business and results of operations of our Company.

Our results of operations and financial condition depend significantly on worldwide economic conditions and the health of the Indian economy. Various factors may lead to a slowdown in the Indian or world economy which in turn may adversely impact our business, financial performance and operations.

We mainly derive revenue from our operations in India and the performance and growth of our business is significantly dependent on the performance of the Indian economy. In the past, the Indian economy has been affected by global economic uncertainties, liquidity crisis, domestic policies, global political environment, volatility in interest rates, currency exchange rates, commodity and electricity prices, volatility in inflation rates and various other regulatory factors. Accordingly, high rates of inflation in India could increase our employee costs and decrease our operating margins, which could have an adverse effect on our results of operations. Accordingly, high rates of inflation in India could increase our employee costs and decrease our operating margins, which could have an adverse effect on our results of operations.

Further the Indian economy is undergoing many changes and it is difficult to predict the impact of certain fundamental economic changes on our business. Conditions outside India, such as a slowdown or recession in the economic growth of other major countries, especially the United States, also have an impact on the growth of the Indian economy. Additionally, an increase in trade deficit, a downgrading in India's sovereign debt rating or a decline in India's foreign exchange reserves could negatively affect interest rates and liquidity, which could adversely affect the Indian economy and our business. A slowdown in the Indian economy could adversely affect the policy of the GoI towards our industry, which may in turn adversely affect our financial performance and our ability to implement our business strategy. A loss of investor confidence in other emerging market economies or any worldwide financial instability may adversely affect the Indian economy. Any changes in the regulations including environmental laws in India and/or globally could materially and adversely affect our business and results of operations and the market price of the Equity Shares.

45. Companies operating in India are subject to a variety of taxes and surcharges.

Tax and other levies imposed by the central and state governments in India that affect our tax liability include central and state taxes and other levies, income tax, goods and services tax, turnover tax, stamp

duty, tax on dividends and other special taxes and surcharges which are introduced on a temporary or permanent basis from time to time. Moreover, the central and state tax scheme in India is extensive and subject to change from time to time. The central or state government may in the future increase the corporate income tax. Any such future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable. Additional tax exposure could adversely affect our business, cash flows and results of operations.

46. You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under the current Indian Income Tax provisions, all transactions of purchase and sales of securities on Indian stock exchanges are subject to levy of securities transaction tax (STT) which will be collected by respective stock exchange on which the securities are transacted. Accordingly, the Indian Income Tax Act has special capital gains tax provisions for all transactions of purchase and sale of equity shares carried out on the Indian Stock Exchanges as enumerated below.

Under the current Indian Income Tax provisions, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Currently, any gain realised on the sale of listed equity shares on a stock exchange held for more than twelve (12) months will not be subject to capital gains tax in India if STT has been paid on the sales transaction. The recent Finance Act amendments provided that where the equity shares have been acquired on or after October 1, 2004 on which STT has not been paid at the time of acquisition, then the exemption of long-term capital gains under Section 10(38) of the Income Tax Act would not be available. This amendment further provides that the GoI will notify certain modes of acquisition to which the recent amendment made by the Finance Act would not be applicable and the shares acquired by such modes of acquisition would continue to get the benefit under Section 10(38) of the Income Tax Act. Such modes of acquisitions, which would continue to get the benefit under Section 10(38) of the Income Tax Act have been notified by the GoI under notification no. 43/2017/F. No. 370142/09/2017-TPL on June 5, 2017.

Any gain realised on the sale of shares on a stock exchange held for a period of twelve (12) months or less will be subject to short term capital gains tax. Further, any gain realised on the sale of listed equity shares held for a period of twelve (12) months or less which are sold other than on a recognised stock exchange and on which no STT has been paid, will be subject to short term capital gains tax at a relatively higher rate as compared to the transaction where STT has been paid in India.

The Ministry of Finance has in the union budget for 2018-19 proposed that any gain in excess of Rs. one (1) Lakh realised on the sale of listed equity shares on a stock exchange held for more than twelve (12) months will be subject to long term capital gains tax of 10% without allowing any benefit of indexation. However, all gains up to January 31, 2018 will be grandfathered. Capital gains arising from the sale of equity shares will be exempt from taxation in India in cases where an exemption is provided under a treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdictions on gains arising from a sale of equity shares.

47. Political instability or significant changes in the economic liberalization and deregulation policies of the Government or in the government of the states where the Company operates could disrupt its business.

The Government has traditionally exercised and continues to exercise a significant influence over many aspects of the Indian economy. The Company's businesses, and the market price and liquidity of its securities may be affected by changes in exchange rates and controls, interest rates, government policies, taxation, social and ethnic instability and other political and economic developments in or affecting India.

In recent years, India has been following a course of economic liberalization and the Company's business could be significantly influenced by socio-economic policies followed by the Government.

However, there can be no assurance that such policies will continue in the future. The rate of economic liberalization could change, and specific laws and policies affecting foreign investment, currency exchange rates and other matters affecting investment in India could change as well.

48. Natural disasters could have a negative impact on the Indian economy and damage the Company's facilities.

The Company's manufacturing facilities are vulnerable to natural disasters. In addition, natural disasters such as floods, earthquakes, epidemics or famines have in the past had a negative impact on the Indian economy. If any such event were to occur, the Company's business could be affected due to the event itself or due to its inability to effectively manage the effects of the particular event. Potential effects include the damage to infrastructure and the loss of business continuity, business information or inventories of raw materials or finished goods. Thus, any disruption in operations at our facility possessing equipment could have a material adverse effect on the Company's ability to provide products to its customers, and thus materially and adversely affect the Company. The recent currency demonetization measures imposed by the Government of India may adversely affect our business and the Indian economy.

49. Any unanticipated measures undertaken by the GoI or any regulatory authority such as the recent demonetization measures may adversely affect our business, financial condition and results of operations.

On November 8, 2016, the GoI announced phasing out of large-denomination currency notes (Rs. 500 and Rs. 1,000, representing 86% of the total currency in circulation) as legal tender. They were immediately replaced with new Rs. 500 and Rs. 2,000 currency notes. This measure was undertaken to curb corruption, tax evasion, and counterfeiting. The withdrawal from circulation started immediately and ended on December 30, 2016. Unexpected demonetization weighed on growth in the third quarter of financial year 2016 - 17. Any such anticipated measures undertaken by the GoI or any regulatory authority may adversely affect our business, financial condition and results of operations.

50. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI or in the alternate, the pricing is in compliance with the extant provisions of the SEBI ICDR Regulations. If the transfer of shares is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection or a tax clearance certificate from the income tax authority. We cannot assure investors that any required approval from the RBI or any other Government agency can be obtained on any particular terms or at all.

51. Instability in Indian and / or global financial markets could adversely affect our results of operations and financial condition.

The financial markets and the economy in India is influenced by economic and market conditions in other countries, particularly in United States of America, Asian emerging markets like Japan, Hong Kong and Singapore. Financial turmoil in global economy in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one (1) country can have adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other markets, including United States, United Kingdom, Japan, Hong Kong and Singapore may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition.

52. Rights of shareholders under Indian law may differ or may be more limited than under the laws of other jurisdictions.

The Companies Act and rules made thereunder, the rules and regulations issued by SEBI and other regulatory authorities, the MOA, and AOA govern the corporate affairs of the Company. Indian legal principles relating to these matters and the validity of corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as a shareholder in India than as a shareholder of a corporation in another jurisdiction.

53. The price of the Equity Shares may be highly volatile after the Issue.

The price of the Equity Shares on the Indian stock exchanges may fluctuate after this Issue as a result of several factors, including volatility in the Indian and global securities market; our operations and performance; performance of our competitors and the perception in the market about investments in the plastic rigid sheets and thermoformed products industry; adverse media reports on us or the Indian plastic rigid sheets and thermoformed products industry; changes in the estimates of our performance or recommendations by financial analysts; significant developments in India's economic liberalization and deregulation policies; and significant developments in India's fiscal and environmental regulations. There can be no assurance that the prices at which the Equity Shares are initially traded will correspond to the prices at which the Equity Shares will trade in the market subsequently.

54. QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid.

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid and are required to pay the Bid Amount upon submission of the Bid. Events affecting the Bidders' decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business and results of operations or financial condition may arise between the date of submission of the Bid and Allotment. However, our Company may complete the Allotment of the Equity Shares even if such events occur, and QIBs and Non-Institutional Investors would not be able to withdraw or lower their Bids at any stage after submitting a Bid.

55. There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the NSE EMERGE in a timely manner or at all.

In accordance with Indian law and practice, permission for listing of the Equity Shares issued pursuant to the Issue will not be granted until after such Equity Shares have been issued and Allotted. Such approval will require all other relevant documents authorizing the issue of Equity Shares to be submitted. There could be a failure or delay in listing these Equity Shares on the NSE EMERGE. Any failure or delay in obtaining the approval would restrict your ability to sell the Equity Shares.

56. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

SECTION III - INTRODUCTORY

SUMMARY OF INDUSTRY

ECONOMIC OUTLOOK

Global Economy

As per International Monetary Fund (IMF) January 2018 World Economic Outlook (WEO), Global output is estimated to have grown by 3.7 percent in 2017, the global growth forecast for 2018 and 2019 is at 3.9 percent for both the years. The growth rate for emerging market and developing economies is estimated to rise up by 4.7 percent in 2017 while it is forecast to rise to 4.9 percent in 2018, 5.0 percent in 2019. This growth forecast primarily reflects stronger projected activity in emerging Europe and Asia for 2017, 2018 and 2019.

The US economy is estimated to be expanded at 2.3 percent in 2017 and projected to expand at 2.3 percent in 2018 and 2.2 percent in 2019. The projection of a continuation of near-term growth that is moderately above potential reflects very supportive financial conditions and strong business and consumer confidence. The U.S. tax policy changes are expected to stimulate activity, with the short-term impact in the U.S. mostly driven by the investment response to the corporate income tax cuts. Over a longer horizon, U.S. growth is expected to moderate. Potential growth is estimated at 1.8 percent, reflecting the assumption of continued sluggish growth in total factor productivity and diminished growth of the workforce due to population aging.

The euro area recovery is expected to gather strength this year, with growth estimated to rise to 2.4 percent in 2017, before moderating to 2.2 percent in 2018 and 2.0 percent in 2019. The growth in 2017 mostly reflects acceleration in exports in the context of the broader pickup in global trade and continued strength in domestic demand growth supported by accommodative financial conditions amid diminished political risk and policy uncertainty. Growth in the United Kingdom is estimated at 1.7 percent in 2017 and to subside to 1.5 percent in 2018 and 2019. The slowdown is driven by softer growth in private consumption as the pound's depreciation weighed on household real income. The medium-term growth outlook is highly uncertain and will depend in part on the new economic relationship with the European Union and the extent of the increase in barriers to trade, migration, and cross-border financial activity.

In China, growth is estimated to notch up to 6.8 percent in 2017, while projected to slow to 6.6 percent in 2018 and 6.4 percent in 2019. The upward revision to the 2017 forecast reflects the stronger-than-expected outturn in the year underpinned by previous policy easing and supply-side reforms.

In the rest of emerging market and developing Asia, growth is expected to be vigorous. Strong government spending and data revisions in India led to an upward revision of 2016 growth to 7.1 percent with upward revisions of about 0.2 percentage point, on average, for 2014 and 2015. However, the growth estimated for 2017 to 6.7 percent reflecting still lingering disruptions associated with the currency exchange initiative introduced in November 2016, as well as transition costs related to the launch of the national Goods and Services Tax in July 2017. The latter move, which promises the unification of India's vast domestic market, is among several key structural reforms under implementation that are expected to help push growth above 8 percent in the medium term. In the ASEAN-5 economies (Indonesia, Malaysia, Philippines, Thailand, Vietnam), growth is estimated to strengthen in 2017 by 5.3 percent, partly because of stronger-than-expected external demand from China and Europe.

Global growth is forecast to increase marginally beyond 2018, reaching 3.8 percent by 2021. With growth in advanced economies projected to gradually decline towards potential growth rate of about 1.7 percent once

economic slack is eliminated, this further pickup in global activity is entirely driven by emerging market and developing economies. In these countries, growth is projected to increase to 5 percent by the end of the forecast period, with their impact on global activity boosted by their rising world economic weight. This forecast assumes some strengthening of growth in commodity exports, though to rates much more modest than in 2000–15; a gradual increase in India’s growth rate resulting from implementation of important structural reforms; continued strong growth in other commodity imports; and a lower but still high trend growth rate in China.

Government Initiative:

The GoI announced the demonetization of high denomination notes of Rs.1,000 and Rs.500, with effect on November 8, 2016, in order to eliminate black money and the growing threat of false banknotes in Indian currency, thus creating opportunities of improvement in economic growth.

In the Union Budget 2017-18, the Finance Minister, stated that the biggest boost of the budget proposals is the stimulation of growth, provide relief to the middle class, provide affordable housing, reduce black money, digitize the economy, increase transparency in political financing and simplify the tax administration in the country.

India's unemployment rate increased to 3.60 % in December 2017, from the previously reported number of 3.50 % in December 2016. India's unemployment rate is updated yearly, available from December 1991 to December 2017, with an average rate of 3.90 %. The data reached an all-time high of 4.40 % in December 2005 and a record low of 3.50 % in December 2016.

Numerous foreign companies are establishing their facilities in India because of several government initiatives such as Make in India and Digital India with the aim of boosting the manufacturing sector of the Indian economy to increase the purchasing power of an average Indian consumer, which would boost demand and stimulate development in addition to benefiting investors. The GoI, under the Make in India initiative, seeks to boost the contribution of the manufacturing sector and aims to raise it to 25 percent of the current 17 percent GDP. In addition, the GoI has also presented the Digital India initiative, which focuses on three basic components: the creation of digital infrastructure, the provision of services in digital form and the increase of digital literacy.

The GoI along with its investment promotion agency, invest India, are in discussion with around 300 Indian and foreign companies to channelize investments worth US\$ 62 Bn., which will help create over 1.7 million job opportunities in India.

Road Ahead:

India is expected to be the third largest consumer economy since its consumption could triple to 4 trillion dollars by 2025, due to the change in consumer behaviour and the pattern of spending, according to a report by BCG; and it is estimated that it will surpass USA to become the second largest economy in terms of PPA for the year 2040. In addition, the Prime Minister has declared that India has become the world's fastest growing economy, and is expected to multiply by five (5) in 2040, due to a series of policy measures.

PP, PET and HIPS

Polyethylene Terephthalate (PET)

PET, which stands for polyethylene terephthalate, is a form of polyester (just like the clothing fabric). It is extruded or molded into plastic bottles and containers for packaging foods and beverages, personal care products, and many other consumer products. PET is a highly valued packaging material because it is strong yet lightweight, non-reactive, economical, and shatterproof. PET, or polyethylene terephthalate, is the chemical name for polyester. When PET is used for fiber or fabric applications, it is usually referred to as "polyester". When used for container and packaging applications, it is typically "PET" or "PET resin". PET is a biologically inert material that doesn't react with foods or beverages and is resistant to attack by micro-organisms. It has also been used by consumers around the world for more than thirty (30) years without any known adverse effects. Extensive testing of PET and PET packaging has repeatedly shown it to be safe. PET itself is biologically inert if ingested.

PET's safety for food, beverage, and personal care, pharmaceutical and medical applications is recognized by health authorities around the world. PET containers are popular for packaging sodas, water, juices, salad dressings, cooking oil, peanut butter, shampoo, liquid hand soap, mouthwash, pharmaceuticals, even tennis balls. Special grades of PET are used for carry-home prepared food containers that can be warmed in the oven or microwave. PET is a polymer of ethylene glycol and terephthalic acid. Pellets of PET resin are heated to a molten liquid, which can be easily extruded or molded into almost any shape.

Rigid plastics record the highest growth rate

Rigid plastic packaging should continue its growth according to a CAGR of 4.4% until 2020 to USD 222.5 Bn.

PET would maintain their market share in terms of packaging industry due to its light weight, which reduces costs and carbon footprint during transport. Its global consumption is set to reach 21.1 million tonnes in 2021 due to technological developments, such as packaging for milk and the ability to fill hot sauces and cooking preparations.

Africa, the Middle East and Asia will be the largest consumers of rigid plastic packaging in the next five (5) years. Inversely, on markets like Australia, demand for carbonated drinks, water and food products seems to be saturated and is moving towards soft plastic packaging as new growth sources.

Further not less than 15% of the Net Issue shall be available for allocation on a proportionate basis to Non-Institutional Bidders and not less than 35% of the Net Issue shall be available for allocation on a proportionate basis to Retail Individual Bidders, subject to valid Bids being received at or above the Issue Price.

Subject to valid Bids being received at or above the Issue Price, under-subscription, if any, in the Non-Institutional Portion and Retail Portion would be allowed to be met with spill-over from other categories or a combination of categories at the discretion of our Company, in consultation with the BRLM and the Designated Stock Exchange. Illustration of Book Building and Price Discovery Process

(Investors should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes bidding by Anchor Investors). Bidders can bid at any price within the price band. For instance, assume a price band of Rs. 20 to Rs. 24 per equity share, Issue size of 3,000 equity shares and receipt of five (5) bids from bidders, details of which are shown in the table below. A graphical representation of the consolidated demand and price would be made available at the bidding centers during the bidding period. The illustrative book below shows the demand for the equity shares of the issuer company at various prices and is collated from bids received from various investors.

Bid Quantity	Bid Price (Rs.)	Cumulative Bid Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the issuer is able to Issue the desired number of shares is the price at which the book cuts off, i.e., Rs. 22 in the above example.

The issuer, in consultation with the Book Running Lead Manager will finalize the Issue Price at or below such cut-off price, i.e., at or below Rs. 22/-. All bids at or above this Issue Price and cut-off bids are valid bids and are considered for allocation in the respective categories.

Steps to be taken by the Bidders for Bidding:

2. Ensure that you have a demat account and the demat account details are correctly mentioned in the Bid cum Application Form;

The exemption for Central or State Governments and officials appointed by the courts and for investors residing in Sikkim is subject to the Depository Participants’ verification of the veracity of such claims of the investors by collecting sufficient documentary evidence in support of their claims;
5. Ensure that the Bid cum Application Form is duly completed as per instructions given in this Red Herring Prospectus and in the Bid cum Application Form;
6. Bids by ASBA Bidders will have to be submitted to the designated branches of the SCSBs or to the Syndicate at the Specified Locations or to the Registered Brokers at the Broker Centres. Ensure that the SCSBs, where the ASBA Account (as specified in the Bid cum Application Form) is maintained has named at least one (1) branch at the Designated Specified Location or the Broker Centre for the members of the Syndicate or the Registered Broker, respectively, to deposit Bid cum Application Forms. A list of such branches is available at the website of SEBI at <https://www.sebi.gov.in/sebiweb/other/OtherAction.do?doRecognised=yes>;
7. ASBA Bidders should ensure that the ASBA Accounts have adequate credit balance at the time of submission to the SCSB or the Syndicate or the Registered Brokers to ensure that the Bid cum Application Form is not rejected.

- a) Failure on part of the SCSBs to make bids in the concerned Exchange system even after the amount has been blocked in the investors' bank account with such SCSB.

The formula for calculation of minimum fair compensation is as follows:

$$\text{Compensation} = (\text{Listing price}^* - \text{Issue Price}) \times \text{No. of shares that would have been allotted if bid was successful} \times \text{Probability of allotment of shares determined on the basis of allotment}$$

**Listing price shall be taken as the highest of the opening prices on the day of listing across the recognized stock Exchanges*

A reference chart for calculation of minimum compensation in case of non-allotment of specified securities to Retail Individual Investors in an IPO is as under:

Example - Security A

Issue Price : 300

Listing Price: 325

Minimum Bid lot: 20 shares

Total Applications received from RII	No. of Equity Shares applied in all valid applications	No. of Shares Reserved for RIIs	No. of times Subscribed
(A)	(B)	(C)	(D) = B/C
2,00,000	3,28,00,000	35,00,000	9.37

In this case maximum possible allottees is $35,00,000 / 20 = 1,75,000$

The basis of allotment is determined by Lead Managers in consultation with the Stock Exchanges as under:

No. of Lots	No. of Shares at each lot	No. of retail Investors applying at each lot	Total No. of Shares applied for at each lot	No. of investors who shall receive minimum bid-lot (to be selected on lottery)	Allotment Ratio Determined	No. of shares allotted per allottee (minimum lot size)
A	B	C	D = (B*C)	E	F=E:C	G
1.	20	10,000	2,00,000	8,750 = (175000/200000)*10000	7:8	20
2.	40	10,000	4,00,000	8,750	7:8	20
3.	60	10,000	6,00,000	8,750	7:8	20
4.	80	10,000	8,00,000	8,750	7:8	20
5.	100	20,000	20,00,000	17,500	7:8	20
6.	120	20,000	24,00,000	17,500	7:8	20
7.	140	15,000	21,00,000	13,125	7:8	20
8.	160	20,000	32,00,000	17,500	7:8	20
9.	180	10,000	18,00,000	8,750	7:8	20
10.	200	15,000	30,00,000	13,125	7:8	20
11.	220	10,000	22,00,000	8,750	7:8	20
12.	240	10,000	24,00,000	8,750	7:8	20
13.	260	10,000	26,00,000	8,750	7:8	20
14.	280	5,000	14,00,000	4,375	7:8	20
15.	300	15,000	45,00,000	13,125	7:8	20
16.	320	10,000	32,00,000	8,750	7:8	20
	Total	2,00,000	3,28,00,000	1,75,000		

In this case if the number of shares applied by an applicant whose bid was unsuccessful due to failure/error on part of SCSB is 20 shares or multiples thereof, then the minimum compensation is calculated as under:

$$\text{Compensation} = (\text{Rs.}325 - \text{Rs.}300) * 20 * (7/8) = \text{Rs.}437.50$$

ECONOMIC OUTLOOK

Global Economy

As per International Monetary Fund (IMF) January 2018 World Economic Outlook (WEO), global output is estimated to have grown by 3.7 percent in 2017, the global growth forecast for 2018 and 2019 is at 3.9 percent for both the years. The growth rate for emerging market and developing economies is estimated to rise up by 4.7 percent in 2017 while it is forecast to rise to 4.9 percent in 2018, 5.0 percent in 2019. This growth forecast primarily reflects stronger projected activity in emerging Europe and Asia for 2017, 2018 and 2019.

The US economy is estimated to be expanded at 2.3 percent in 2017 and projected to expand at 2.3 percent in 2018 and 2.2 percent in 2019. The projection of a continuation of near-term growth that is moderately above potential reflects very supportive financial conditions and strong business and consumer confidence. The U.S. tax policy changes are expected to stimulate activity, with the short-term impact in the U.S. mostly driven by the investment response to the corporate income tax cuts. Over a longer horizon, U.S. growth is expected to moderate. Potential growth is estimated at 1.8 percent, reflecting the assumption of continued sluggish growth in total factor productivity and diminished growth of the workforce due to population aging.

The euro area recovery is expected to gather strength this year, with growth estimated to rise to 2.4 percent in 2017, before moderating to 2.2 percent in 2018 and 2.0 percent in 2019. The growth in 2017 mostly reflects acceleration in exports in the context of the broader pickup in global trade and continued strength in domestic demand growth supported by accommodative financial conditions amid diminished political risk and policy uncertainty. Growth in the United Kingdom is estimated at 1.7 percent in 2017 and to subside to 1.5 percent in 2018 and 2019. The slowdown is driven by softer growth in private consumption as the pound’s depreciation weighed on household real income. The medium-term growth outlook is highly uncertain and will depend in

part on the new economic relationship with the European Union and the extent of the increase in barriers to trade, migration, and cross-border financial activity.

In China, growth is estimated to notch up to 6.8 percent in 2017, while projected to slow to 6.6 percent in 2018 and 6.4 percent in 2019. The upward revision to the 2017 forecast reflects the stronger-than-expected outturn in the year underpinned by previous policy easing and supply-side reforms.

In the rest of emerging market and developing Asia, growth is expected to be vigorous. Strong government spending and data revisions in India led to an upward revision of 2016 growth to 7.1 percent with upward revisions of about 0.2 percentage point, on average, for 2014 and 2015. However, the growth estimated for 2017 to 6.7 percent reflecting still lingering disruptions associated with the currency exchange initiative introduced in November 2016, as well as transition costs related to the launch of the national Goods and Services Tax in July 2017. The latter move, which promises the unification of India's vast domestic market, is among several key structural reforms under implementation that are expected to help push growth above 8 percent in the medium term. In the ASEAN-5 economies (Indonesia, Malaysia, Philippines, Thailand, Vietnam), growth is estimated to strengthen in 2017 by 5.3 percent, partly because of stronger-than-expected external demand from China and Europe.

Global growth is forecast to increase marginally beyond 2018, reaching 3.8 percent by 2021. With growth in advanced economies projected to gradually decline toward potential growth rates of about 1.7 percent once economic slack is eliminated, this further pickup in global activity is entirely driven by emerging market and developing economies. In these countries, growth is projected to increase to 5 percent by the end of the forecast period, with their impact on global activity boosted by their rising world economic weight. This forecast assumes some strengthening of growth in commodity exports, though to rates much more modest than in 2000–15; a gradual increase in India's growth rate resulting from implementation of important Structural reforms; continued strong growth in other commodity imports; and a lower but still high trend growth rate in China.

Government Initiative:

The GoI announced the demonetization of high denomination notes of Rs.1,000 and Rs.500, with effect on November 8, 2016, in order to eliminate black money and the growing threat of false banknotes in Indian currency, thus creating opportunities of improvement in economic growth.

In the Union Budget 2017-18, the Finance Minister, stated that the biggest boost of the budget proposals is the stimulation of growth, provide relief to the middle class, provide affordable housing, reduce black money, digitize the economy, increase transparency in political financing and simplify the tax administration in the country.

India’s unemployment rate increased to 3.60 % in December 2017, from the previously reported number of 3.50 % in December 2016. India's unemployment rate is updated yearly, available from December 1991 to December 2017, with an average rate of 3.90 %. Numerous foreign companies are establishing their facilities in India because of several government initiatives such as Make in India and Digital India with the aim of boosting the manufacturing sector of the Indian economy to increase the purchasing power of an average Indian consumer, which would boost demand and stimulate development in addition to benefiting investors. The GoI, under the Make in India initiative, seeks to boost the contribution of the manufacturing sector and aims to raise it to 25 percent of the current 17 percent GDP. In addition, the GoI has also presented the Digital India initiative, which focuses on three basic components: the creation of digital infrastructure, the provision of services in digital form and the increase of digital literacy.

The GoI along with its investment promotion agency, Invest India, are in discussion with around 300 Indian and foreign companies to channelize investments worth US\$ 62 Bn., which will help create over 1.7 million job opportunities in India.

Road Ahead:

India is expected to be the third largest consumer economy since its consumption could triple to 4 trillion dollars by 2025, due to the change in consumer behaviour and the pattern of spending, according to a report by BCG; and it is estimated that it will surpass USA to become the second largest economy in terms of PPA for the year 2040. In addition, the Prime Minister has declared that India has become the world's fastest growing economy, and is expected to multiply by five (5) in 2040, due to a series of policy measures.

PP, PET and HIPS

Polyethylene Terephthalate (PET)

PET, which stands for polyethylene terephthalate, is a form of polyester (just like the clothing fabric). It is extruded or molded into plastic bottles and containers for packaging foods and beverages, personal care products, and many other consumer products. PET is a highly valued packaging material because it is strong yet lightweight, non-reactive, economical, and shatterproof. PET, or polyethylene terephthalate, is the chemical name for polyester. When PET is used for fiber or fabric applications, it is usually referred to as "polyester". When used for container and packaging applications, it is typically "PET" Or "PET resin". PET is a biologically inert material that doesn't react with foods or beverages and is resistant to attack by micro-organisms. It has also been used by consumers around the world for more than 30 years without any known adverse effects. Extensive testing of PET and PET packaging has repeatedly shown it to be safe. PET itself is biologically inert if ingested.

PET's safety for food, beverage, and personal care, pharmaceutical and medical applications is recognized by health authorities around the world. PET containers are popular for packaging sodas, water, juices, salad dressings, cooking oil, peanut butter, shampoo, liquid hand soap, mouthwash, pharmaceuticals, even tennis balls. Special grades of PET are used for carry-home prepared food containers that can be warmed in the oven or microwave. PET is a polymer of ethylene glycol and terephthalic acid. Pellets of PET resin are heated to a molten liquid, which can be easily extruded or molded into almost any shape.

Rigid plastics record the highest growth rate

Rigid plastic packaging should continue its growth according to a CAGR of 4.4% until 2020 to USD 222.5 Bn.

PET would maintain their market share in terms of packaging industry due to its light weight, which reduces costs and carbon footprint during transport. Its global consumption is set to reach 21.1 million tonnes in 2021 due to technological developments, such as packaging for milk and the ability to fill hot sauces and cooking preparations.

Africa, the Middle East and Asia will be the largest consumers of rigid plastic packaging in the next five years. Inversely, on markets like Australia, demand for carbonated drinks, water and food products seems to be saturated and is moving towards soft plastic packaging as new growth sources.

Polypropylene (PP)

Polypropylene (PP) is a thermoplastic polymer used in a wide variety of applications. An additional polymer made from the monomer propylene, it can be produced in a variety of structures giving rise to a variety of applications including packaging and labeling, textiles, plastic parts and reusable containers of various types, laboratory equipment, automotive components, and medical devices. It is a white, mechanically rugged, and resistant to many chemical solvents, bases and acids.

The large numbers of end-use applications for polypropylene are often possible because of the ability to tailor grades with specific molecular properties and additives during its manufacture. For example, antistatic additives can be added to help polypropylene surfaces resist dust and dirt. Many physical finishing techniques can also be used on polypropylene, such as machining. Surface treatments can be applied to polypropylene parts in order to promote adhesion of printing ink and paints.

High Impact Polystyrene (HIPS)

High Impact Polystyrene is a rubber-modified version of General Purpose Polystyrene (GPPS), which exhibits high impact strength in sheet form, is easily fabricated and vacuum formed. High impact polystyrene sheet (or HIPS sheet as it's known in the trade) is a very versatile material and provides a cost effective route to the production of parts for many industrial sectors. High Impact Polystyrene sheets exhibit much higher impact strength than a General Purpose Polystyrene or standard run-of-the-mill substrate, the high impact styrene means it has more rubber content, which makes it easier to vacuum form and will bend/ mould easier with better durability.

Benefits of High Impact Polystyrene:

- I High Impact Polystyrene (HIPS) is an economical and versatile plastic
- II It can be easily molded and has excellent impact resistance
- III It is aesthetically pleasing in design and is a formable plastic
- IV It can be easily painted thanks to its amorphous qualities

High Impact Polystyrene (HIPS) is often used in applications that require; flexibility, impact resistance and machinability.

PACKAGING INDUSTRY PROSPECTS

Packaging Industry:

Packaging in general is classified into two (2) significant types i.e. rigid packaging and flexible packaging. Flexible & rigid packaging industry anticipates a strong growth in the future.

(Source: CARE Advisory Report, July 2018)

Plastic packaging industry grew at a CAGR of 15.6% from FY10 to FY15 and expected to grow at CAGR 18% from FY15 to FY20. While overall packaging industry has grown by 15.6%, the rigid plastic packaging industry has grown by 20.8%. Further the rigid plastic packaging industry is expected to grow by 25% over next five (5) years as against overall packaging CAGR of 18%. Further growth in rigid plastic packaging industry has outpaced the flexible packaging industry in the past and it is projected to outpace in future as well.

The packaging segment in India is an amalgamation of both organized and unorganized players ranging from very small players with limited presence of big players with large market share. Demand for this segment is anticipated to grow rapidly across all the players. Also there is an increasing focus on innovative and cost effective packaging materials. Thus, the industry players are keeping in track with the changing trends in packaging and making efforts to capture the market with higher technology orientation. Further with a viewpoint of health and environment friendliness, the growth in packaging industry has been leading to greater specialization and sophistication amongst the market players.

Plastic packaging is one of the fastest growing industries and stands at USD 700 Bn. globally. It has grown higher than GDP in most of the countries. In developing country like India, it grew at a CAGR of 16% in the last five years and touched approx. USD 32 Bn in FY15. The Indian plastic packaging industry constitutes around 4% of the global plastic packaging industry. The per capita packaging consumption in India is low at 4.3 kgs, compared to developed countries like Germany and Taiwan where it is 42 kgs and 19 kgs respectively.

However in the coming years Indian packaging industry is expected to grow at 18% p.a. wherein, the rigid packaging is expected to grow at 25 % p.a. and flexible packaging to grow at 15 % p.a. This growth is powered by increased penetration of packaged food and personal products in to the semi urban and rural segment and shift in manufacturing operations from high cost geographies to comparatively low cost industry in India.

In tier 2 and tier 3 cities, the average pack sizes are usually smaller than the pack sizes in tier 1 cities. This results in increased use of packaging consumption in the FMCG industry. As the Government is increasing its spending in the rural economy, increased demand for FMCG products is experienced in the hinter lands of India. The growth is likely to intensify in the next 2 - 3 years.

Packaging encompasses a wide range of material types across paper board, metals, plastic, wood, glass and other materials. However amongst all the substitutes available, 'Plastic Packaging' is the fastest emerging trend in the packaging industry. Plastics today form the foundation of our “convenience consumer culture”. The traditional materials like paper boards, metals, wood, glass etc. have been replaced by plastics in many applications due to their cost to performance ratio.

Plastics replacing the traditionally used materials			
Product		Traditional Material	Current Trend
Milk/ Edible Oil	➔	Glass/ Metal	➔ 3/ 5 Layer Film Pouches
Toiletries (Soap / Shampoos)	➔	Paper/ Glass	➔ Plastic Pouches / Films
MPCG (Cement / Fertilizer)	➔	Jute	➔ PP / HDPE Woven Sack
Toothpaste	➔	Metal	➔ Plastic Lamitube

Rigid Packaging

Market for rigid plastic packaging in India:

The market for rigid plastic packaging in India has grown well in the recent years and stood at about INR 535 Bn. in 2015-16. The market is expected to grow at a CAGR of around 25% during the next five (5) years. Northern region is by far the largest market for rigid plastics packaging and accounts for a share of 35%, followed by West at 32%.

Rigid plastic packaging products used for consumer packaging applications include bottles, jars, cups, tubs & pots, trays, tubes, pails, Yoghurt and Ice cream Containers, Plates, Bowls, Cup lids and Trays. Polyethylene terephthalate (PET), High Impact Polystyrene (HIPS) and polypropylene (PP) are the commonly used polymers for the manufacture of rigid containers. Low-density polyethylene (LDPE), linear low-density polyethylene (LLDPE), polystyrene (PS) and polyvinyl chloride (PVC) are other polymers used in the Indian context.

Global rigid plastic packaging consumption:

Global rigid plastic packaging consumption will be worth \$166 Bn. in 2017, and exceed \$200 Bn. by 2022. Volume consumption of rigid plastics globally will reach 52.9 million tonnes in 2017, and is projected to grow over the next five (5) years at an annual rate of 3.7% to 63.4 million tonnes.

Rigid plastic packaging market expansion will continue to profit from the drive to replace traditional materials – principally glass and metal – with lighter weight, more cost effective and higher performance plastic materials in various markets. This transition is being accelerated by concept innovations – such as the clear plastic can.

Companies across many end-use segments are increasingly recognizing that sustainability in packaging is a core value, rather than a one-off sales and marketing opportunity, while retailers are now offering biodegradable packaging for a wide range of produce, including fresh foods, organic and private label brands.

Emerging technology

Technology is playing an important role in rigid plastic packaging market development as it competes with rival packaging types.

- Bio-based plastics, including 100% bio-based PET bottles, are expected to enter commercial production and establish significant market share over the next five years
- Producers have developed considerably lighter plastic packaging in recent years and opportunities remain for further light weighting of plastic packaging
- Improved barrier solutions enable further penetration of rigid plastic packaging into applications such as fruit juices, milk, wine and hot-fill food jars, and reducing emissions during transport.

The figures from a regional perspective, emerging economies are expected to grow rigid plastic packaging demand at the highest rates across 2017-2022.

Asia is already the largest consumer of rigid plastic packaging, accounting for a projected 31.4% consumption share by volume in 2017. North America is the second largest consumer with 22.7%, followed by Western Europe with 20.0%. Asia is forecast to continue growing at a faster rate than any other world region with an annual average growth rate of 5.8% for the next five (5) years.

(Source: CARE Advisory Report, July 2018)

Food is the largest end-use market for rigid plastic packaging, accounting for a projected 37% consumption share in 2017. The healthcare sector is forecast to grow at the highest rate, followed by other food markets, drinks and cosmetics.

Market Opportunities

- **Rural Market** - Rural consumption of FMCG products has outpaced urban consumption with the percentage increase in monthly per capita expenditure in rural markets surpassing its urban counterparts. Leading companies in the FMCG sector have a strong distribution network in rural India and are benefitting from the contribution of technological advances such as internet and better logistics services.
- **Innovative Products** - Indian consumers are highly adaptable to new and innovative products. As Indian consumers become increasingly exposed to global products, their demand for innovative products has been increasing, which is resulting in higher R&D expenditure by the leading market players.
- **India as an Export Hub** - With emergence of India as a strong regional economy, domestic and multinational FMCG players can leverage India as a strategic sourcing hub for cost-competitive products to cater to international markets. This has been witnessed as a strategy of several FMCG companies whose revenues from the international markets has been increasing.

Pharmaceutical Packaging in India:

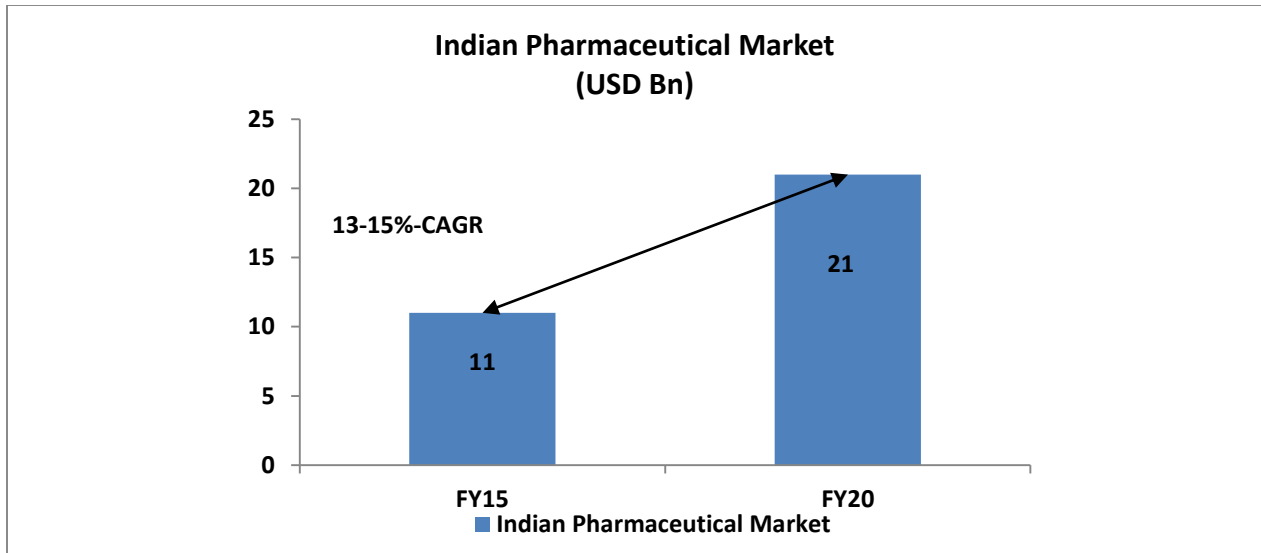

The Indian pharmaceutical packaging industry is witnessing a spurt in growth. Today, the packaging industry in India is considered a sunrise industry and its linkages are extensive and highly employment creating. On one side, it involves manufacture (and sometimes import) of a wide range of packing material - paper, paperboard, cardboard, a range of polymer products including rigid and flexible packaging material, aluminium foil, tin and good old wood and steel.

Growth will follow upward trends in global medication consumption, which will expand at a strong pace as aging demographic patterns lead to an increasing number of diseases and disorders. Pharmaceuticals will assume an expanding role in worldwide health care delivery based on new product introductions and economic advantages over other forms of patient treatment.

Besides upward trends in medication consumption, the adoption of stricter regulations and standards governing the production, storage, distribution and labelling of pharmaceuticals will boost global growth opportunities for packaging products and accessories.

Therefore, due to increasing expertise in the packaging of F&B, medicinal, home & personal care and other heavy industrial products, plastic packaging segment is expected to capture the packaging demand. The overall packaging industry in India has a huge growth potential and is expected to reach USD 73 Bn. in FY 20. Additionally, India is growing as a manufacturing hub and the exports are also growing. To cater to the international market, the packaging standards are being uplifted which calls for adopting better packaging methods, materials and machineries to make sure that the quality of end product and visual appeal is top notch.

Moreover highly favourable demographic patters in India such as increasing working age population, growing disposable income, growth in middle class, ongoing urbanization and changing lifestyles etc. will further drive the growth of packaging industry in India.

Retail Industry

Retail Industry is one of the most dynamic industries in India. It has experienced high growth over the past years, with a gradual shift towards modern retailing formats. Indian retail market has attracted and increased the presence of multinational companies and therefore boosted demand in spaces such as F&B, consumers' products, cosmetics etc. Rising income levels is also stimulating the growth of organized retail which therefore increases the demand for innovative and attracting packaging concepts.

(Source: CARE Advisory Report, July 2018)

In the retail segment, Food & Beverages are one of the key growing segments. It falls amongst the biggest end users of packaging. Growth in F&B sector will drive the packaging demand and also demand for plastic packaging, as it ensures food safety, quality and long shelf life. Since packaged food is the fastest growing segment, it is expected to fuel the demand of plastic packaging in India. Spend on packaged foods is increasing

(at inflexion point) due to Increase in per capita income, Urbanization and Increase in working woman population. The graph below indicates the per capita expense on the packaged food in India.

Indian Plastics Industry

India is a growing market for plastics and consumes about 12.8 Million Metric Tonnes (MMT) of plastics annually against global consumption of 285 MMT per year. The plastics and polymer consumption is growing at an average rate of 10%. About 30,000 processing units with 1,13,000 processing machines have created manufacturing capacity of 30 MMT per annum in India. This has been achieved with a 13% CAGR of processing capacity during last five (5) years. The industry has invested \$5 Bn. in the machinery and it is expected to make further investment of \$10 Bn. for further increase in capacities during the next five (5) years.

The downstream plastic processing industry is highly fragmented and consists of micro, small and medium units. Out of 30,000 processing units, about 75% are in the small-scale sector. The small-scale sector, however, accounts for only about 25% of polymer consumption. The industry also consumes recycled plastic, which constitutes about 30% of total consumption.

(Source: CARE Advisory Report, July 2018)

Exports from India

Products from the Indian Plastic Industry are exported to over 150 countries round the globe with the major trading partners being the European Union, USA, China, UAE, Saudi Arabia, Turkey, Nigeria, Indonesia, Egypt etc.

The exports of Plastic Products aggregated to US\$ 4.860 Bn. during the year 2013-14. During this year the exports of Plastic Polymers were US\$ 3.057 Bn. Thus, the exports of Plastic Polymers and Plastic Products from India totaled US\$ 7.917 Bn.

Growth of Indian Plastic Industry:

- Huge growth opportunities in India for Plastics due to lower per capita consumption as compared to world average.
- New applications / innovations in Packaging development is driving growth in India.

Future opportunities for Packaging sector in India

The growth in the plastic packaging industry in India will be majorly impacted by the end use industries, growing consumerism and government initiatives such as Make in India.

1. **End-Use Industries:** The Indian food & beverage industry has nearly 25% yearly growth and major application of plastics in food products is in packaging. Thus growth in food and beverage sector highlights the growth potential for plastics in packaging. Similarly, personal care sector, which is growing at nearly 15%, will also drive demand for rigid plastics, as it is the most used material for packaging of personal care products. Other industrial sectors such as, pharmaceutical that is proposed to grow at 13-15% over next five (5) years, retail industry, that is currently witnessing the shift from unorganized to organized retail; will also stimulate the demand of plastic in packaging material.
2. **Consumerism:** Growing consumerism will also contribute to growing demand. Consumer's preference for the use of convenient packaging and affordable packaging is driving the market towards rigid packaging in India. Consumers today are increasingly looking to buy products which are suitable for

handling, long lasting and easy to store and as plastics can be used with great versatility, they have been the preferred choice in packaging. This growth will also be pushed by the increasing size of middle class population in tier II/III cities in the country.

3. **Make in India:** The Government's current campaign on 'Make in India' which aims to turn the country into a global manufacturing hub will have positive impact on the growth of packaging industry. The proposed policies of government for technology up-gradation fund scheme, setting up SEZs to overcome bottlenecks of infrastructure and creating business friendly policies will help in exploring the underlying potential. Also the extended support from Ministry of Chemicals & Fertilizers and the CIPET will drive the growth of plastic industry in India. For example an export-oriented plastic cluster has been proposed to be set up at an investment of over INR 100 crore in Lucknow. IIA in collaboration with CIPET will set up this cluster. Cluster has already generated interest amongst 200 industrialists and entrepreneurs and is expected to generate direct employment opportunity for approx. 2,500 youth.

THERMOFORMED PACKAGING PRODUCTS INDUSTRY OVERVIEW

Thermoforming is a process where a sheet of plastic is heated to make it flexible and then it is fabricated and molded in required shape to make it a usable product. Different methods used for processing thermoformed plastics are thin gauge thermoforming, thick gauge thermoforming, plug assist forming, and vacuum snapback.

Rising demand in various application sectors including food packaging, automotive, healthcare & medical, electrical & electronics, construction, and consumer goods & appliances owing to cost efficient nature is projected to propel the market over the coming years. Rapid industrialization, infrastructural, and medical activities is anticipated to augment the market growth from 2017 to 2025. The global thermoformed plastics market is expected to reach US\$16.28 Bn by 2025. Thermoformed plastics in medical industry are used for the manufacture of diagnostic systems, accessories, and medical plants.

Thin gauge thermoforming was projected to be the largest segment over the forecast period with a market share of 35% in terms of revenue in 2016. High labor cost and fluctuation raw material prices are major factors which negatively impact the market growth. Asia Pacific is the fastest growing segment with potential growth opportunities. Rising demand from industries such as automotive, medical, food packaging, construction, and pharmaceuticals in this region is expecting to boost the market over the forecast period.

Outlook:

1. The global thermoformed plastics demand exceeded 3,80,000 tons in 2016 and is expected to grow at a CAGR of 4.2% from 2017 to 2025.
2. Polypropylene accounted for around 21% of the overall market segment- emerged as the largest product segment in 2016 and is estimated to generate revenue over US\$3.5 Bn. by 2025. PP is used to produce food packaging products such as cups, trays, margarine tubs, sandwich packs, disposable products, beverage glasses, and microwaveable containers. Increasing manufacturers of packaging products using polypropylene is projected to propel the industry.
3. Thin gauge thermoforming was projected to be the largest process segment and is anticipated to witness moderate growth over the next eight (8) years.
4. Automotive sector was 36,000 tons in 2016 and is expected to grow at a CAGR of 4.8% over the forecast period.
5. Food packaging was the significant application segment in 2016 and is projected to grow at a moderate rate owing to increasing consumption of ready to eat food is expected to boost this segment.
6. The food and medical packaging industry in Asia Pacific is projected to witness significant growth over the next eight (8) years owing to various developments across major economies and increasing per capita

income. The regional market in terms of revenue is expected to grow at a CAGR of 5.2% from 2017 to 2025.

Global thermoformed plastics market revenue by application, 2016

Automotive segment emerged as the fastest growing application segment in 2016. Increasing use of the product in this sector for its durability, reusable carts, and light-weight vehicle parts is projected to fuel the market growth over the forecast period. Increasing demand for automotive panels, liners, and vehicle parts is expected to spur the market from 2017 to 2025.

North America was the leading thermoformed plastics regional segment and accounted for around 53% of the total revenue in 2016. Rapid industrialization and growing packaging industry is projected to propel the market over the forecast period. Increasing manufacturers and suppliers of thermoformed plastic products in this region is expected to boost the industry growth. The U.S. is the significant market for producing thermoformed packaging followed by Canada. Asia Pacific is expected to be the fastest growing regional segment. Emerging economies in a region including India and China have been experiencing strong economic growth. Increasing population and disposable income have spurred the market demand in medical device packaging, automotive parts, and construction sectors. China is the largest producer and supplier of thermoformed plastics, equipment using different types of technologies in this region. China's rapid urbanization is supported by strong economic growth. Increasing per capita disposable income in this region is projected to propel the market over the forecast period. Asia Pacific was the accounted for around 14% of the overall revenue in 2016. Rising developmental activities in Asia Pacific in the production of thermoformed plastic products is projected to propel the market over the forecast period.

Increasing company product offerings for the end-use industries such as medical, food packaging, electrical & electronics, consumer & commercial sector, automotive, construction, and pharmaceuticals are expected to be a key parameter for being competitive in this market. Rising mergers and acquisitions being undertaken as an attempt to strengthen the presence and gain industry share.

The global thermoformed plastics market is driven by the large application of thermoformed plastic in food packaging. As food packaging requires superior quality packaging materials to ensure protection against moisture, odor, and bacteria, which is provided by thermoplastics, their demand is significantly high in the food industry.

Thermoformed plastics have a wide range of applications and are also cost-effective, which have significantly aided in the market's expansion over the last few years. The food industry is a major application segment of the market which is expected to drive global demand over the forecast period. Thermoform plastics used in this industry are less in weight, flexible, restrain to bacteria, and odor & moisture free in comparison to other packaging materials on account of which they are preferred over others such as wood and glass.

Due to the changing lifestyle and increasing disposable income, consumers across China and India have been exhibiting high demand for packaged food. Given the scenario, both these countries have emerged as lucrative markets for thermoformed plastics. Besides this, the report has also identified increasing scope for the application for thermoforming process as manufacturers look to replace injection molding process owing to the lower cost incurred on tooling and benefits of high-speed production. Spurred by these factors, the demand for thermoformed plastics is expected to increase in developed and emerging markets alike.

Market Growth

The global thermoformed plastics market will grow progressively and post a CAGR of approximately 5.2% by 2020. The increasing usage of thermoformed plastics in food and healthcare packaging will be one of the

primary drivers for this market. Thermoformed plastics in the form of clamshells will be used extensively in the food packaging industries because of its superior resistance to bacteria, odor, and moisture. Furthermore, the injection molded plastics will be used for the manufacturing of medical disposables and medical devices because of their unique engineering and designing properties including surgical gloves, plastic scissors, and urology disposables.

Market analysts predict that the Americas will be the fastest growing market and will post a CAGR of around 5% by 2020. Among all the regions in the Americas, the U.S. is envisaged to be the largest consumer of thermoformed plastics. The government in this region has implemented strict regulations to control emissions from vehicles. The implementation of such regulations has led to the replacement of metal parts with engineering plastics. Furthermore, with the extensive use thermoformed plastics in the packaging industry, the market in the Americas will exhibit strong growth over the next few years.

The market is highly competitive and is dominated by a few major players. The manufacturers will invest in technological innovations and the development of products with thick and thin gauge thermoforming, vacuum forming, pressure forming, and plug assist. Additionally, many vendors will be shifting their focus towards the productions of bio-derived, bio-degradable, and recyclable polymers as alternatives to conventional petroleum-based polymers. The adoption of new and improved technologies and the preference for uniformity in products will help sellers sustain the level of competition in the market during the period of next four years. During 2015, the polyethylene terephthalate segment dominated the market by accounting for approximately 40% of the total market share. The increasing applications of polyethylene terephthalate based thermoformed plastics in sectors such as personal care, medical, food, and other consumer product packaging will be one of the primary factors contributing to the growth of this segment.

In the food packaging segment, many vendors are focusing on producing products with durable quality designs and exceptional clarity and are also providing seals for industries dealing in disposable food packaging containers. This change in the vendors' production preferences will aid in the growth of the food packaging application segment during the next four years.

In 2015, with a market share of approximately 45%, Americas dominated the global thermoformed plastics market, followed by EMEA with 33% and APAC with around 22%.

The consumption of thermoformed plastics in the Americas is expected to exceed 2 Mn metric tons by 2020, growing at a CAGR of more than 5%. The region is the largest consumer of thermoformed plastics, with the US as the major consumer. Regulations to control emissions from vehicles and increased replacement of metal parts with engineering plastics are the major drivers for the market growth. In the Americas, a large proportion of thermoformed plastics are used in the packaging industry. The growing population of the elderly in the US (14.5% of the US population is 65 years or older), increased use of disposable products, the importance of child-resistant and senior-friendly packaging, and the rise in tamper-evident packaging as well as contract packaging are the main factors driving the demand for thermoformed plastics in the Americas.

Consumption forecast

The consumption of thermoformed plastics in EMEA is expected to reach 1.5 Mn metric tons by 2020, growing at a CAGR of close to 5%. The market for thermoformed plastics in EMEA is expected to grow steadily during the forecast period. France, Germany, and the UK are the major consumers of thermoformed plastics in the region. The increased use of high-performance engineering plastics in automobiles and in electrical and electronics applications is propelling market growth in the region. The consumption of thermoformed plastics in APAC will exceed 986 thousand metric tons by 2020, growing at a CAGR of more than 4%. The market for thermoformed plastics is expected to post robust growth in APAC. The growth in the manufacturing sector, especially in developing economies such as China and India, will drive the market growth in the region. The

electronic industry in APAC is expected to grow at 4.5%-5.5% during the forecast period. Further, the rise in disposable incomes and changes in lifestyle are fostering the market for packaged foods in these countries, thereby increasing the consumption of thermoformed plastic food containers.

However, the fluctuating cost of crude oil, the primary source of raw material for the production of thermoformed plastics, is a major challenge for manufacturers of thermoformed plastic products in the region.

Indian dairy market overview

India has the largest population in the world with a processing capacity of 98.3 million litres per day. Over the past two (2) decades, dairy farming has progressed towards emerging as an organised industry that encompasses not only increased production of milk and milk products, but also the breeding of high- yielding cattle, scientific animal rearing and customised feed production.

Dairy activities are traditionally integral to India's rural economy; the country ranks as the world's largest producer and consumer of dairy products with a 19% share. More than 90% of India's milk production is concentrated in fourteen (14) states (the top five (5) being Uttar Pradesh, Rajasthan, Andhra Pradesh, Gujarat and Punjab).

Currently, 15% of the average households' food expenditure is on milk or milk-based products. The offtake of milk and milk-based products has increased not only in cities but also in small towns and rural areas due to the increased demand for quality products and growing health consciousness.

India's combined butter and ghee production for 2017 is estimated to rise 3.8% to 5.4 million metric tonnes. Milk sales went up by 2.81% in December 2016 on a y-o-y basis from 321 Lakhs litres per day to 329 Lakhs litres. The last six months of 2016 saw milk production decline ~15% and milk prices increase Rs.4-5 per litre. The prices of milk-based products strengthened 4.69%. The ice cream market in India is pegged to grow at a five-year CAGR of 17.03% till 2021 – from US\$1.5 Bn. to \$3.4 Bn. in 2021.

Several factors are responsible for an increasing number of international and domestic ice cream brands entering the market: improved cold storage facilities, changing consumer tastes, younger population and an increase in disposable incomes.

The Indian paneer industry's total output reached 1.6 million metric tonnes in 2016. Skimmed milk powder exports from India reached 1,542 metric tonnes while non-fat dry milk production levels were estimated at 570,000 metric tonnes.

In 2016, there were 75 million dairy farmers, with only 40% in the organized sector. The value of milk procured by village level dairy coop societies stood at Rs. 120 crore per day. The total milk procurement was 850 Lakhs litres per day (co-op sector, private: 425 Lakhs litres). Ghee represented the second largest (~13%) consumed dairy product in India after milk and is expected to grow at a six year CAGR of 17% till 2020.

Growth drivers

Increasing per capita incomes: Consumer expenditures in the Tier-II and Tier-III cities are rising at a rate of approx. 14% and in the metros at a rate of around 12% per annum. Moreover, improved health consciousness has contributed to a visible increase in the demand of qualitatively consistent products. Result: The Indian dairy industry is anticipated to reach a market size of US\$ 118 Bn. in 2017.

DEMAND DRIVERS FOR THE INDUSTRY

Key growth drivers for packaging industry

Indian packaging industry is fragmented with unorganized players having a larger share of the segment. However, with increasing awareness, better products and shrinking cost advantages, the industry is expected to tilt towards organized players. According to the Institute of Packaging (IIP), the packaging sector in 2015 was valued at US\$32 Bn. and is expected to reach US\$73 Bn. by 2020. India's per capita packaging consumption is a mere 4.3kg, while other developing countries like China/Taiwan/Germany have approx. 6/19/42kg per capita consumption respectively.

The Indian packaging industry which witnessed a CAGR growth of approx. 16% over FY10-FY15 is expected to grow at 18% over FY15-FY20 due to the following factors:

- Rise of organized retail;
- Growth in smaller packages due to nuclear family and increasing rural penetration;
- Demand for better packaging resulting from e-commerce boom;
- Growing trend of packed foods to increase shelf life of food products;
- Packaging being used as a branding tool;
- Growing penetration of packaged food driven by new applications in food retailing, higher disposable incomes;
- New converting and packaging equipment, which have increased applications of poly films.

India's fast growing and increasingly sophisticated middle class is driving demand for an ever growing range of higher value processed food products which utilize flexible packaging. Currently barely 5% of food in India reaches the consumer in pre-packaged form.

Other Demand Drivers:

1. Urbanization:

Modern technology is now an integral part of nation's society today with high-end package usage increasing rapidly. As consumerism is rising, rural India is also slowly changing into more of an urban society. The liberalization of the Indian economy, coupled with globalization and the influx of the multi-nationals, has improved the quality of all types of primary and secondary packaging. Also industrialization and expected emergence of the organized retail industry is fuelling the growth of packaging industry.

2. Increasing Health Consciousness:

As people are becoming more health conscious, there is a growing trend towards well packed, branded products rather than the loose and unpackaged formats. Today even a common man is conscious about the food intake he consumes in day-to-day life.

3. Changing Food Habits amongst Indians:

Changing lifestyles and lesser time to spend in kitchens are resulting in more incidence of eating away from homes resulting in explosive growth of restaurants and fast food outlets all over the country. Indians are trying out newer cuisines and also purchasing similar food items for their homes. Therefore, the review period has

seen new products like pasta, soups, and noodles being launched in India, fuelling the growth of packaging industry in India.

4. Personal health consciousness amongst Indians:

With growing awareness towards contagious diseases, awareness towards usage of contraceptives and disposables syringes have increased the demand for packaging required for the same.

5. Increase in Rural Consumption leads to growth in retail sector:

India comprises of a big rural market and there has been growing focus on rural marketing. Rural consumption has increased, led by a combination of increasing incomes and higher aspiration levels; there is an increased demand for branded products in rural India.

CHALLENGES FACED BY THE SECTOR

Lack of Domestic Technology: Indian manufacturing industry has seen a shift from low output/ low technology machines to high output/high technology machines, and the domestic plastic processing industry is no exception.

High input costs: The plastic industry in India is a labor intensive industry as compared to its western counterparts. This has impacted the productivity in an unfavorable way. With the ever expanding population, growing needs for electricity has led to unreliable power and high energy costs in India.

Highly fragmented and competitive industry: The current capacity utilization for the industry is around 68%. The rise in capacity could bring more pressure on the realizations and margins. However, globally the capacity in other countries is likely to rise by only 9% over next two years.

Regulatory threat on use of plastic products: There is an increasing concern among consumers for environmentally sustainable packaging solutions. Any move towards legalizing it by the government would increase costs for the manufacturers. Although plastic packaging has many benefits, increasing environment concerns could result in government policies limiting its use which would slowdown entire industry's growth. For example, recently, the state of Maharashtra has implemented the Maharashtra Plastic and Thermocol Products (Manufacture, Usage, Sale, Transport, Handling and Storage) Notification, 2018, under which certain plastic products were banned from manufacturing and distribution in the state of Maharashtra.

Environmental concerns: Apart from playing an increasing role in packaging and consumer products plastics also take up a growing percentage of municipal solid waste streams and pose environmental challenges. They are considered to be a major threat to environment and public health. Improper disposal of plastics clog the water bodies, it leads to ground water pollution, disturbance of soil microbe activity, release of poisonous chemicals thereby harming the human health and the entire ecosystem. These adverse impacts therefore alarm the society to ensure proper disposal of plastic. Going ahead recycling & reuse of plastics could be a foremost step towards fostering innovation and sustainability. If plastics can be collected and disposed of or recycled as per laid down guidelines/rules then the issue of plastic waste can be suitably addressed. Also increased awareness through help of industry groups and Government could help address some of these challenges.

We have improved our average RoCE from 9.75% in FY 2015 to 23.48% in FY 2018.

We have adopted certain measures across all our manufacturing facilities to improve our operational efficiency and the reliability of our manufacturing processes by lowering machine break downs, wastages and rejections. Our processes have helped us to meet our customers' expectations on quality, cost and service and have further helped to reduce customer complaints.

Our size and scale enable us to produce greater volumes of products from each of our facilities and spread our fixed costs, more widely to reduce our production costs on a per unit basis, allowing us to reduce our unit sales price and increase our competitiveness.

We intend to use a variety of other manufacturing strategies, sourcing strategies and cost reduction strategies to continue to improve our operational efficiencies. For example, we plan to: (i) install machines with higher productivity; (ii) implement appropriate automation to reduce manpower cost; (iii) improve energy conservation measures; (iv) rationalise our manpower requirements; (v) actively work towards optimization of process and reduce wastages that help reduce production costs; and (vi) periodically review our vendor base so that we secure the best cost amongst the available vendors that meet our quality requirements.

Continually co-develop products with our key customers

We will continue to co-develop products with our customers as we have done in the past. We feel this helps in strengthening our relationship with the customers and increases their confidence in us. Our manufacturing facilities are equipped with various machines for extrusion, thermoforming, printing, sleeving, vast collection of moulds, dies & tools and other ancillary machines.

Following are the details of the machines that are available in our manufacturing facilities:

Extrusion Machines

Extrusion is an initial and a vital process, since it helps us in producing sheets of various materials, sizes and colours.

Our manufacturing facilities are equipped with a series of extruders, indigenous, as well as imported. The total extrusion capacity is over 10,000 MT p.a. These extruders are capable to process PS, PP and PET materials. The machines are equipped with automated feeding and dosing systems, melt pump, online thickness gauge monitoring, etc. which are few of the features enabling us to produce high quality and multiple layer sheets.

Thermoforming Machines

We have a series of thermoforming machines indigenous, as well as imported. Additionally, our facilities are equipped with a vast collection of moulds that can manufacture more than 100 types of products in various shapes and sizes. We have the ability to process PS, PP and PET materials. Some of the features of these machines include pre-heaters, servo plug assist, accurate mould temperature control, auto stacking of thermoformed parts, in-line skeleton grinder etc. which allows us to offer superior and consistent quality products with minimum human intervention.

Decoration

Decoration plays a vital role in making the product attractive and informative, apart from creating visibility. It is an important aspect of packaging. When the product is displayed on the shelf, the first thing that would attract the customer will be the packaging. We are equipped with the desired machinery that creates attractive graphics which makes the product stand out from the competition. Currently, we are equipped with two (2) different decorative technologies i.e. dry offset printing and sleeving.

A. Dry Offset Printing

We are equipped with a series of printing machines both indigenous and Swiss made, which can print up to eight (8) colors. Graphics with half tone images can be printed with higher accuracy. Further, we ensure consistent quality by using food grade UV inks. We also have an in-house graphic design department to offer quick service and support to our customers. Some of the features of the machines include 'no cup no print system', auto-loading and auto stacking of cups, pre-registered metal based printing plates and temperature controlled ink stations.

B. Sleeving

Sleeving technology is used for better aesthetics and for shorter run products. Our sleeving machines are custom designed and are equipped with auto loading of cup, auto sleeve application, auto stacking and counting of cups.

Ancillary Machines

We have various types of ancillary machines to support the production process like air compressor, cooling tower, chilling plant, grinder, mixer etc.

We consider all our machines and manufacturing facilities to be in good condition.

Our work process

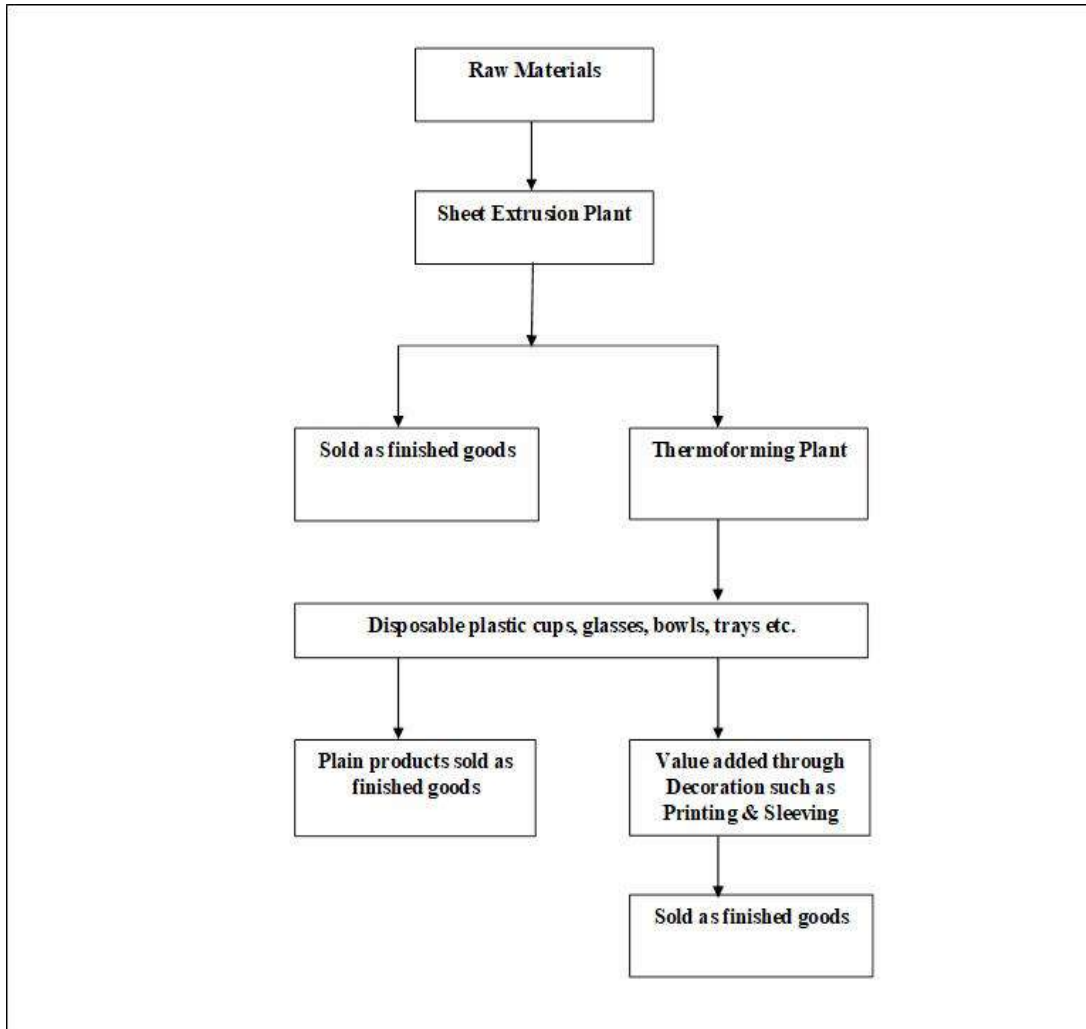

Our work process involves extrusion of sheets as per the desired specification. These sheets are sold as finished goods and are also used for captive consumption in the thermoforming process to produce products of various sizes and designs. These products are sold as plain products and are also decorated by dry offset printing or shrink sleeving process.

The main machines involved in the above process are:

- a) Extrusion machines;
- b) Thermoforming machines and moulds;

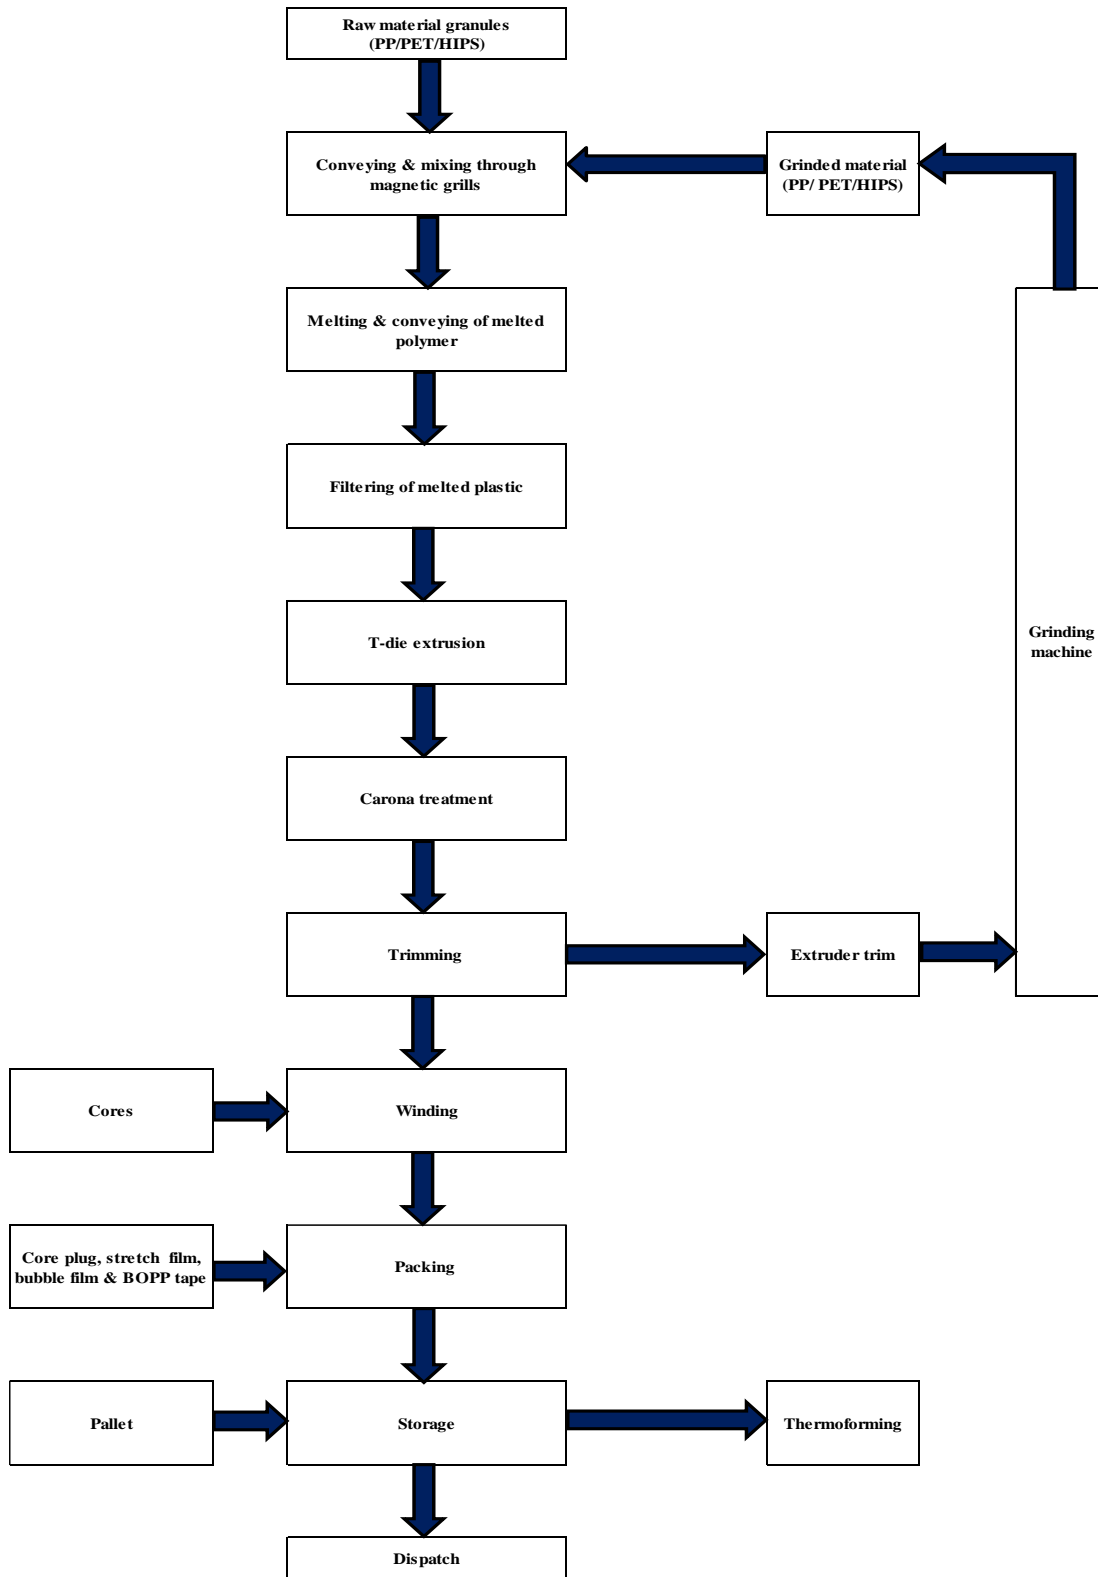

- c) Decoration, i.e., printing and sleeving machines; and
- d) Ancillary equipments like chiller, air compressor, grinder & cooling tower etc.

Please refer to the flow-chart below for details on step-by-step process:

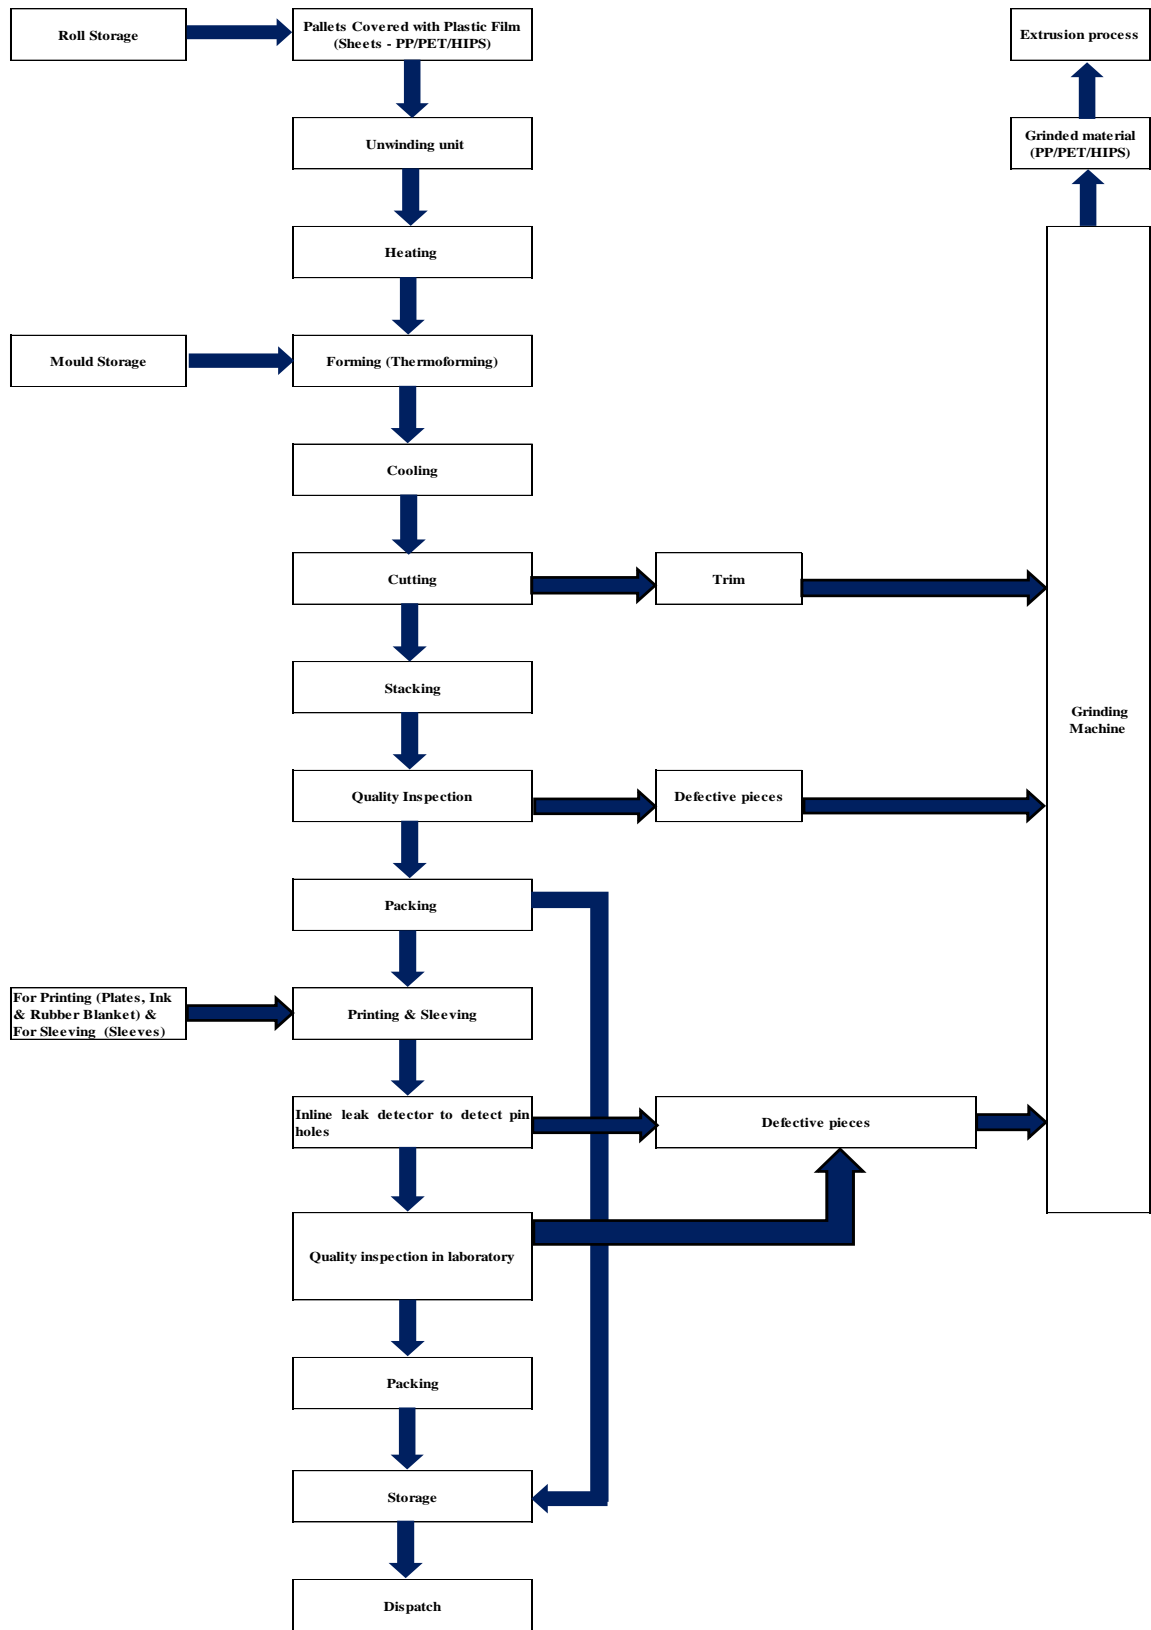

The details of each stage of manufacturing is given as under:

1. Extrusion

- The main raw material, master batch and in-house recycled material, is mixed in the desired proportion with auto weighing, auto blending and is automatically fed into the hopper of the extruder and subsequently the material passes through a screw and barrel system where it is processed at the desired set temperature;
- The temperature of the heater is controlled within an accuracy of $\pm 2^{\circ}$ C with the help of a closed loop temperature controller which is monitored and controlled on the control panel;
- We can produce mono layer or multi-layer sheets. The material coming from the various extruders can be adjusted in different layers with the help of feed block;
- The material then passes through the T-die, which can be adjusted to obtain the desired thickness & width;
- These sheets then pass through the calendaring unit which is a set of polished rollers, which cools the sheets and imparts a gloss to the sheets;
- These sheets then pass through the 'take off unit' to the winder station.

2. Thermoforming

- The sheets manufactured on the extruder are fed as a raw-material to the forming machine;
- These rolls are unwound by the un-winder station and then moved by the sheet conveying chain mechanism;
- These sheets are passed through the heating station, which is a bank of infrared ceramic heaters, which is controlled by a PLC controlled temperature controller;
- These sheets are heated to the desired temperature for a preset time, which is then conveyed to the forming station. The various steps of the process takes place at the forming station like pre-forming, forming, cutting and ejection;
- The mould is mounted on the forming area in the forming station;
- The material is formed and removed for further processing / packing.

3. Dry offset printing

- The cups are fed on the mandrel by an automatic un-loader unit;
- There are eight (8) mandrel holders on the turret. These turrets are driven by a specially designed indexing unit. The mandrel on the mandrel holder is as per the design of the article, so the articles of various shapes and sizes can be printed here;
- The printing station is a 8-colour UV printing unit;
- The printing ink is fed into the ink station. The ink is mixed and meshed through various rollers like dab roller, rider roller and oscillating rollers;
- The plate cylinder holds the printing plate. These plates can be changed as per the designs;
- The matter from the plate roller is transferred to the blanket of the blanket roller, which is finally transferred to the article loaded on the mandrel;
- After the printing process is completed, the article is dried by the UV light. The drying takes place on the mandrel itself;
- The article is then collected for packing and dispatch.

4. Ancillary Machines

We have various types of ancillary machines to support the production process like air compressor, cooling tower, chilling plant, grinder, mixer etc.

Sales and marketing

We have a sales and marketing team and process in place. As on June 30, 2018, our dedicated sales and marketing team consists of eleven (11) employees. Marketing efforts are approved by our senior management personnel on a case to case basis.

Leads for domestic & export sales are generated by the marketing team from various sources such as reference by distributors, commission agents, market visits, exhibitions, online portals, etc. and monitored by our senior management personnel directly.

Customers are taken on board based on market enquiries, review of financial statements and references. Our Company insists on 100% advance payments from new customers to cover the risk of 'back-out' or non-payment. Complete customer details are obtained by the marketing team so as to inform the senior management personnel about the same.

For institutional, dairy products, MNCs and export sales, prices are quoted based on specifications approved by customers and are subsequently negotiated by our marketing team. In some cases, specifically for institutional and dairy product sales, we have to fill up tenders online and all such documents are kept in our record.

For the general market, quotations and confirmations are provided either via email or verbally.

Our marketing team is also responsible for working alongside our production team in cases of co-development of products with our customers and getting the samples approved.

Our customers

Our customers are predominantly from the food & beverage industry, including some of India's well known dairy products and large FMCG companies. We have a long-standing relationship with all our major customers.

We rely on purchase orders from our customers and do not enter into firm-commitment or long term supply agreements. The purchase orders specify prices, quantities for the products and delivery schedule. These purchase orders are subject to conditions such as ensuring that all products delivered to the customer are as per the approved specifications.

**During the year our Company has imported a small quantity of materials amounting to Rs. 1,215 from Malaysia.*

For FY 2018 and 2017, our total raw materials costs accounted for 55.53% and 54.41% respectively, of our total revenues for the said periods. The total cost of raw materials includes cost incurred for production of finished goods which have been sold as well as finished goods or work in progress lying in inventory. High Impact Polystyrene (HIPS) is a versatile, economical and impact-resistant plastic that is easy to machine and fabricate. The features of HIPS include thermoforming/ vacuum forming which can be used in various industries like packaging, pharmaceutical, dairy products, etc. The advantages of HIPS include extra transparency, better rigidity at lower wall thickness, higher mechanical strength and better flexibility and high puncture resistance. Natural (translucent white) HIPS is Food and Drugs Administration compliant for use in food processing applications.

Polyethylene Terephthalate (PET) is a thermoplastic material which is high in demand in the thermoforming synthetic packaging market. Its favorable attributes include its excellent transparency near-equal to that of glass and its high mechanical strength, allowing the production of dimensionally stable, rigid packaging with relatively small wall thicknesses. Additionally, its oxygen barrier qualities make it suitable for fresh food items.

The features of PET include thermoforming which enables it to be used in various industries like food packaging, pharmaceutical packaging, boxes, thermoforming laminated sheet for FFS, electronics etc.

Polypropylene (PP) has established itself as the most important packaging material next to polystyrene. Due to its semi crystalline structure PP has a comparatively narrow processing window requiring special know-how from machine manufacturers and tool makers as well as processors.

The favorable characteristics of PP are its high resistance to fat and oil which is why it is the preferred packaging material for dairy products. Its imperviousness to water vapour and its frost resistance ability is a useful benefit especially in the frozen food packaging market. Depending on the type of material, a PP tray can even be transferred directly from the freezer to the microwave and heated without suffering any damages.

Trends in PP packaging are moving towards the use of highly crystalline extremely rigid PP homopolymers for further reduction of wall thickness in packaging with simultaneous high heat resistance and a further improved water vapour barrier.

The features of PP include thermoforming which enables it to be used in various industries like food packaging, pharmaceutical packaging, boxes and stationary.

Although the advantages are common between the three (3) principle raw materials used by our Company, their application and usage is varied.

For details of our major suppliers' contribution, please refer the table below:

For FY 2017

Particulars	% (of total raw material costs)
Top three (3) suppliers	55.66%
Top five (5) suppliers	67.66%
Top ten (10) suppliers	85.95%

Note: Percentage of raw materials purchased includes duty and taxes and other expenses.

Utilities

Energy

Electricity is an important and substantial component in our industry. For the Fiscal 2018 and 2017, our total energy costs comprised 3.78% and 4.31% respectively, of our total revenues, which we feel is one of our strengths by operating out of Daman as the power costs in Daman are comparatively lower as opposed to other states. Our Company purchases electricity from Daman Electricity Board. We undertake energy conservation measures, as a result of which we are able to save on electricity costs.

The sanctioned and connected power load at our factories is as under:

Factory Unit – I	650 KVA
Factory Unit – II	1,250 KVA
Factory Unit - III	250 KVA

INTELLECTUAL PROPERTY LAWS

Intellectual Property in India enjoys protection under both common law and statute. Under statute, India provides for patent protection under the Patents Act, 1970, copyright protection under the Copyright Act, 1957, trademark protection under the Trade Marks Act, 1999 and design protection under the Designs Act, 2000. The above enactments provide for protection of intellectual property by imposing civil and criminal liability for infringement.

The Trade Marks Act, 1999 (the “Trade Marks Act”)

Indian trademark law permits the registration of trademarks for goods and services. The Trade Marks Act governs the statutory protection of trademarks and for the prevention of the use of fraudulent marks in India. Certification marks and collective marks can also be registered under the Trademarks Act. An application for trademark registration may be made by individual or joint applicants by any person claiming to be the proprietor of a trade mark, and can be made on the basis of either use or intention to use a trademark in the future. Applications for a trademark registration may be made for in one or more international classes. Once granted, trademark registration is valid for ten (10) years unless cancelled. If not renewed after ten (10) years, the mark lapses and the registration has to be restored. While both registered and unregistered trademarks are protected under Indian Law, the registration of trademarks offers significant advantages to the registered

owner, particularly with respect to proving infringement. The Trade Mark (Amendment) Act, 2010 has been enacted by the GoI to amend the Trade Marks Act in order to enable Indian nationals as well as foreign nationals to secure simultaneous protection of trademark in other countries, and to empower the Registrar of Trademarks to do so. It also seeks to simplify the law relating to transfer of ownership of trademarks by assignment or transmission and to bring the law generally in line with international practice.

In addition to the broad requirement that an invention, a patent has to satisfy the requirements of novelty, utility and non-obviousness in order for it to avail patent protection. The Patents Act stipulates that patent protection may not be granted to certain specified types of inventions and materials even if they satisfy the above criteria. The Patents Act prohibits any person resident in India from applying for patent for an invention outside India without making an application for the invention in India. The term of a patent granted under the Patents Act is twenty (20) years from the date of filing of the application for the patent.

Off Balance Sheet Arrangements

We do not have any off-balance sheet arrangements or derivative instruments, which can reasonably have a current or future material effect on our results of operations or financials condition.

Quantitative and Qualitative Disclosures about Market Risk

Market risk is the risk of loss related to adverse changes in market prices, including interest rate and foreign exchange fluctuation risk. We are exposed to various types of market risks in the normal course of business like interest rate risk, foreign exchange fluctuation risk, inflation risk and commodity price risk amongst others.

Interest Rate Risk

Our exposure to interest rate risks primarily relates to our debt. Fluctuations in interest rates could negatively affect the amount of interest payable by us under our debt obligations and could make it more difficult for us to procure new debt on attractive terms.

Foreign exchange risk

Changes in currency exchange rates influence our results of operations. We import some of our machineries and raw materials and also export our products which are denominated in foreign currencies, primarily in USD and Euro. Because of our foreign currency exposures, exchange rate fluctuations between the Indian Rupee and foreign currencies, especially the USD, CHF, GBP and Euro, can have a material impact on our results of operations, cash flows and financial condition. The exchange rate between the Indian Rupee and USD/ Euro has been volatile in recent periods. We have certain foreign currency loans which have been hedged partially, but this may not give complete protection from the foreign currency exposure on interest or repayment of such loans.

Impact of Inflation

In recent years, India has experienced relatively high rates of inflation. While we believe inflation has not had any material impact on our business and results of operations, inflation generally impacts the overall economy and business environment and hence could affect us.

Commodity Price Risk

We are exposed to the risk that prices for our primary raw materials used for the manufacture of plastic rigid sheets and thermoformed products have always been volatile. The cost of raw material consumed represented 55.53% and 54.41% of our total revenues in Fiscal 2018 and Fiscal 2017, respectively. These materials are global commodities and their prices are cyclical in nature and fluctuate in accordance with global market conditions. Further, the prices of our commodities are also depending on the demand.

Significant Developments after March 31, 2018

To the best of our knowledge, except as mentioned below and as disclosed in this Red Herring Prospectus, there are no subsequent developments in our business after the date of our financial statements contained in this Red Herring Prospectus which materially affects, or is likely to affect, our operations or profitability, or the value of our assets, or our ability to pay our material liabilities within the next 12 months:

In the month of January 2018, our Company has installed one sleeving machine, which has led to increase in the sleeving capacity from six million units per month to nine million units per month. We believe this will help in improving our turnover and profitability.

Unusual or infrequent events or transactions.

Total turnover of each major industry segment

The Company is mainly engaged in the business of manufacturing rigid plastic sheets and thermoformed rigid plastic packaging products. All other activities of the Company revolve around the main business and as such, there are no separate reportable segments.

New Product or Business Segment

Other than as described in the chapter titled “*Business Overview*” beginning on page 129 of this Red Herring Prospectus, to our knowledge, there are no new products or business segments.

Seasonality

By virtue of supplying to multiple segments of FMCG industry, we believe that we are relatively insulated against seasonality, as each segment that we cater to, is active at different points throughout the year. However, there can be no assurances that the same trend may continue.

Information for Bidders

In addition to the instructions provided to the Bidders set forth in the sub-section “*Issue Procedure – Part B – General Information Document for Investing in Public Issues*” beginning on page 344 of this Red Herring Prospectus, Bidders are requested to note the following additional information in relation to the Issue.

1. The relevant Designated Intermediary will enter each Bid option into the electronic Bidding system as a separate Bid and generate a TRS, for each price and demand option and give the same to the Bidder. Therefore, a Bidder can receive up to three (3) TRS for each Bid cum Application Form. It is the Bidder’s responsibility to obtain the TRS from the relevant Designated Intermediary. The registration of the Bid by the Designated Intermediary does not guarantee that the Equity Shares shall be allocated/Allotted. Such TRS will be non-negotiable and by itself will not create any obligation of any kind. When a Bidder revises his or her Bid, he /she shall surrender the earlier TRS and may request for a revised TRS from the relevant Designated Intermediary as proof of his or her having revised the previous Bid.
2. In relation to electronic registration of Bids, the permission given by NSE EMERGE to use their network and software of the electronic bidding system should not in any way be deemed or construed to mean that the compliance with various statutory and other requirements by our Company and/or the BRLM are cleared or approved by NSE EMERGE; nor does it in any manner warrant, certify or endorse the correctness or completeness of compliance with the statutory and other requirements, nor does it take any responsibility for the financial or other soundness of our Company, the management or any scheme or project of our Company; nor does it in any manner warrant, certify or endorse the correctness or completeness of any of the contents of the Draft Red Herring Prospectus or the Red Herring Prospectus; nor does it warrant that the Equity Shares will be listed or will continue to be listed on NSE EMERGE.
3. In the event of an upward revision in the Price Band, Retail Individual Bidders who had Bid at Cut-off Price could either (i) revise their Bid or (ii) shall make additional payment based on the cap of the revised Price Band (such that the total amount i.e., original Bid Amount plus additional payment does not exceed

Rs. 200,000 if the Bidder wants to continue to Bid at Cut-off Price). The revised Bids must be submitted to the same Designated Intermediary to whom the original Bid was submitted. If the total amount (i.e., the original Bid Amount plus additional payment) exceeds Rs. 200,000, the Bid will be considered for allocation under the Non-Institutional Portion. If, however, the Retail Individual Bidder does not either revise the Bid or make additional payment and the Issue Price is higher than the cap of the Price Band prior to revision, the number of Equity Shares Bid for shall be adjusted downwards for the purpose of allocation, such that no additional payment would be required from the Retail Individual Bidder and the Retail Individual Bidder is deemed to have approved such revised Bid at Cut-off Price.

4. In the event of a downward revision in the Price Band, Retail Individual Bidders who have bid at Cut-off Price may revise their Bid; otherwise, the excess amount paid at the time of Bidding would be unblocked after Allotment is finalised.
5. Any revision of the Bid shall be accompanied by instructions to block the incremental amount, if any, to be paid on account of the upward revision of the Bid.

Signing of the Underwriting Agreement and the RoC Filing

Our Company, the BRLM and the Syndicate have entered into an Underwriting Agreement. After finalisation of the Issue Price, an updated Red Herring Prospectus will be filed with the RoC in accordance with applicable law, which then would be termed as the Prospectus. The Prospectus will contain details of the Issue Price, the Anchor Investor Issue Price and Issue size and will be complete in all material respects.

For instance, assume a price band of Rs. 20 to Rs. 24 per share, issue size of 3,000 equity shares and receipt of five (5) bids from bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the equity shares of the issuer company at various prices and is collated from bids received from various investors.

Bid Quantity	Bid Price (Rs.)	Cumulative Quantity	Subscription
500	24	500	16.70%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.70%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the issuer is able to issue the desired number of equity shares is the price at which the book cuts off, i.e., Rs. 22.00 in the above example. The issuer, in consultation with the book running lead managers, will finalise the issue price at or below such cut-off price, i.e., at or below Rs. 22.00. All bids at or above this issue price and cut-off bids are valid bids and are considered for allocation in the respective categories.

(e) Alternate Method of Book Building – NOT APPLICABLE

In case of FPOs, Issuers may opt for an alternate method of Book Building in which only the Floor Price is specified for the purposes of Bidding (“Alternate Book Building Process”).

The Issuer may specify the Floor Price in the RHP or advertise the Floor Price at least one Working Day prior to the Bid/ Issue Opening Date. QIBs may Bid at a price higher than the Floor Price and the Allotment to the QIBs is made on a price priority basis. The Bidder with the highest Bid Amount is allotted the number of Equity Shares Bid for and then the second highest Bidder is Allotted Equity Shares and this process continues until all the Equity Shares have been allotted. RIBs and NIBs are Allotted Equity Shares at the Floor Price and Allotment to these categories of Bidders is made proportionately. If the number of Equity Shares Bid for at a price is more than available quantity then the Allotment may be done on a proportionate basis. Further, the Issuer may place a cap either in terms of number of specified securities or percentage of issued capital of the Issuer that may be Allotted to a single Bidder, decide whether a Bidder be allowed to revise the bid upwards or downwards in terms of price and/or quantity and also decide whether a Bidder be allowed single or multiple bids.

SECTION 6: ISSUE PROCEDURE IN FIXED PRICE ISSUE – NOT APPLICABLE

Applicants may note that there is no Bid cum Application Form in a Fixed Price Offer. As the Issue Price is mentioned in the Fixed Price Issue therefore on filing of the Prospectus with the RoC, the Application so submitted is considered as the Bid cum Application Form.

Applicants may only use the specified Application Form for the purpose of making an Application in terms of the Prospectus which may be submitted through the Designated Intermediary.

Applicants may submit an Application Form either in physical form to the any of the Designated Intermediaries or in the electronic form to the SCSB or the Designated Branches of the SCSBs authorising blocking of funds that are available in the bank account specified in the Application Form only (“ASBA Account”). The Application Form is also made available on the websites of the NSE EMERGE at least one day prior to the Bid/ Issue Opening Date.

In a fixed price Offer, allocation in the net offer to the public category is made as follows: minimum fifty per cent to Retail Individual Bidders; and remaining to (i) individual investors other than Retail Individual Bidders; and (ii) other Applicants including corporate bodies or institutions, irrespective of the number of specified securities applied for. The unsubscribed portion in either of the categories specified above may be allocated to the Applicants in the other category. For details of instructions in relation to the Application Form, Bidders/Applicants may refer to the relevant section of the GID.

SECTION 7: ALLOTMENT PROCEDURE AND BASIS OF ALLOTMENT

For Basis of Allotment to Anchor Investors, Bidders/Applicants may refer the RHP/Prospectus. The requirement for 90% minimum subscription in terms of Regulation 14 of SEBI ICDR Regulations is not applicable to the Issue. In terms of Regulation 106P (1) of SEBI ICDR Regulations, the Issue is not restricted to any minimum subscription level and is 100% underwritten.

7.1 ALLOTMENT TO RIBs

Bids received from the RIBs at or above the Issue Price may be grouped together to determine the total demand under this category. If the aggregate demand in this category is less than or equal to the Retail Category at or above the Issue Price, full Allotment may be made to the RIBs to the extent of the valid Bids. If the aggregate demand in this category is greater than the allocation to in the Retail Category at or above the Issue Price, then

the maximum number of RIBs who can be Allotted the minimum Bid Lot will be computed by dividing the total number of Equity Shares available for Allotment to RIBs by the minimum Bid Lot (“Maximum RIB Allottees”). The Allotment to the RIBs will then be made in the following manner:

- (a) In the event the number of RIBs who have submitted valid Bids in the Issue is equal to or less than Maximum RIB Allottees, (i) all such RIBs shall be Allotted the minimum Bid Lot; and (ii) the balance available Equity Shares, if any, remaining in the Retail Category shall be Allotted on a proportionate basis to the RIBs who have received Allotment as per (i) above for the balance demand of the Equity Shares Bid by them (i.e. who have Bid for more than the minimum Bid Lot).
- (b) In the event the number of RIBs who have submitted valid Bids in the Issue is more than Maximum RIB Allottees, the RIBs (in that category) who will then be Allotted minimum Bid Lot shall be determined on the basis of draw of lots.

7.2 ALLOTMENT TO NIBS

Bids received from NIBs at or above the Issue Price may be grouped together to determine the total demand under this category. The Allotment to all successful NIBs may be made at or above the Issue Price. If the aggregate demand in this category is less than or equal to the Non-Institutional Category at or above the Issue Price, full Allotment may be made to NIBs to the extent of their demand. In case the aggregate demand in this category is greater than the Non-Institutional Category at or above the Issue Price, Allotment may be made on a proportionate basis up to a minimum of the Non-Institutional Category.

7.3 ALLOTMENT TO QIBs

For the Basis of Allotment to Anchor Investors, Bidders/Applicants may refer to SEBI ICDR Regulations or RHP/Prospectus. The QIB Category may be available for Allotment to QIBs who have Bid at a price that is equal to or greater than the Issue Price. Allotment may be undertaken in the following manner:

- (a) In the first instance allocation to Mutual Funds for up to 5% of the QIB Category may be determined as follows: (i) In the event that Bids by Mutual Fund exceeds 5% of the QIB Category, allocation to Mutual Funds may be done on a proportionate basis for up to 5% of the QIB Category; (ii) In the event that the aggregate demand from Mutual Funds is less than 5% of the QIB Category then all Mutual Funds may get full Allotment to the extent of valid Bids received above the Issue Price; and Equity Shares remaining unsubscribed, if any and not allocated to Mutual Funds may be available for Allotment to all QIBs as set out at paragraph 7.4(b) below;
- (b) In the second instance, Allotment to all QIBs may be determined as follows: (i) In the event of oversubscription in the QIB Category, all QIBs who have submitted Bids above the Issue Price may be Allotted Equity Shares on a proportionate basis for up to 95% of the QIB Category; (ii) Mutual Funds, who have received allocation as per (a) above, for less than the number of Equity Shares Bid for by them, are eligible to receive Equity Shares on a proportionate basis along with other QIBs; and (iii) Under-subscription below 5% of the QIB Category, if any, from Mutual Funds, may be included for allocation to the remaining QIBs on a proportionate basis.

In the event of the Issue being over-subscribed, the Issuer may finalise the Basis of Allotment in consultation with NSE EMERGE in accordance with SEBI ICDR Regulations.

The allocation may be made in marketable lots, on a proportionate basis as explained below:

- (a) Bidders may be categorized according to the number of Equity Shares applied for;
- (b) The total number of Equity Shares to be Allotted to each category as a whole may be arrived at on a proportionate basis, which is the total number of Equity Shares applied for in that category (number of Bidders in the category multiplied by the number of Equity Shares applied for) multiplied by the inverse of the over-subscription ratio;

- (c) The number of Equity Shares to be Allotted to the successful Bidders may be arrived at on a proportionate basis, which is total number of Equity Shares applied for by each Bidder in that category multiplied by the inverse of the over-subscription ratio;
- (d) In all Bids where the proportionate Allotment is less than the minimum Bid Lot decided per Bidder, the Allotment may be made as follows: the successful Bidders out of the total Bidders for a category may be determined by a draw of lots in a manner such that the total number of Equity Shares Allotted in that category is equal to the number of Equity Shares calculated in accordance with (b) above; and each successful Bidder may be Allotted a minimum of such Equity Shares equal to the minimum Bid Lot finalised by the Issuer;
- (e) If the proportionate Allotment to a Bidder is a number that is more than the minimum Bid lot but is not a multiple of one (which is the marketable lot), the decimal may be rounded off to the higher whole number if that decimal is 0.5 or higher. If that number is lower than 0.5 it may be rounded off to the lower whole number. Allotment to all Bidders in such categories may be arrived at after such rounding off; and
- (f) If the Equity Shares allocated on a proportionate basis to any category are more than the Equity Shares Allotted to the Bidders in that category, the remaining Equity Shares available for Allotment may be first adjusted against any other category, where the Allotted Equity Shares are not sufficient for proportionate Allotment to the successful Bidders in that category. RESTRICTION ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the consolidated FDI Policy and FEMA. The government bodies responsible for granting foreign investment approvals are the concerned ministries/departments of the Government of India and the RBI. The union cabinet has recently approved phasing out the FIPB, as provided in the press release dated May 24, 2017. The DIPP issued the Standard Operating Procedure ('SOP') for Processing FDI Proposals on June 29, 2017 (the "SOP"). The SOP provides a list of the competent authorities for granting approval for foreign investment for sectors/activities requiring Government approval. For sectors or activities that are currently under automatic route but which required Government approval earlier as per the extant policy during the relevant period, the concerned administrative ministry/department shall act as the competent authority (the "**Competent Authority**") for the grant of postfacto approval for foreign investment. In circumstances where there is a doubt as to which department shall act as the Competent Authority, DIPP shall identify the Competent Authority.

The GoI has from time to time made policy pronouncements on FDI through press notes and press releases. The Consolidated FDI Policy superseded all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on August 28, 2017. RBI has issued Master Directions - Foreign Investments in India dated January 4, 2018. In terms of the said Master Directions, an Indian company may issue fresh shares to person resident outside India (who are eligible to make investments in India, for which eligibility criteria are as prescribed). Such fresh issue of shares shall be subject to inter-alia, the pricing guidelines prescribed under the said Master Directions.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the foreign direct investment policy and transfer does not attract the provisions of SEBI Takeover Regulations; (ii) the Non-Resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI/RBI.

As per the existing policy of the GoI, OCBs cannot participate in this Issue.

The Equity Shares have not been and will not be registered under the U.S Securities Act or any other applicable law of the United States and, unless so registered, and may not be offered or sold within the United States, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S Securities Act and applicable state securities laws. Accordingly, the Equity Shares are only being offered and sold (i) within the United States only to persons reasonably believed to be "qualified institutional buyers" (as defined in Rule 144A under the U.S Securities Act and referred to in this Red Herring Prospectus as "U.S. QIBs", for the avoidance of doubt, the term U.S. QIBs does not refer to a category of institutional investor defined under applicable Indian regulations and referred to in this Red Herring Prospectus as "QIBs") in transactions exempt from, or not subject to, the registration requirements of the U.S Securities Act, and (ii) outside the United States in offshore transactions in reliance on Regulation S under the U.S Securities Act and the applicable laws of the jurisdiction where those offers and sales occur.

The Equity Shares have not been and will not be registered, listed or otherwise qualified in any other jurisdiction outside India and may not be offered or sold, and Bids may not be made by persons in any such jurisdiction, except in compliance with the applicable laws of such jurisdiction.

The above information is given for the benefit of the Bidders. Our Company and the BRLM are not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date
