Market Forecast

Nifty daily range 26000-26300

Nifty, once again witnessed a sluggish session finding resistance near the 26180 zone during the intraday session and with a gradual drag ended near the 26140 zone with a doji pattern visible on the daily chart with bias still maintained intact. With IT stocks among the major gainer, the index would have the major support positioned near the 50EMA level of 25900 zone as mentioned earlier, which needs to be sustained to maintain the overall bias intact, whereas on the upside the target of 26500 level is expected. BankNifty amid slight volatility erased some of the gains with overall rangebound movement visible to end the session near the 60000 zone with bias still maintained positive and hoping for a revival in the coming sessions, with the index having the important support positioned near the 50EMA level at 58700 zone which needs to be sustained and as of now and once the near-term support at around 59500 level is sustained, we can expect for further continuation of the upward move.

The support for the day is seen at 26000 levels, while the resistance is seen at 26300 levels. BankNifty would have the daily range of 59500-60500 levels.
