## Market Preview

### Nifty extends gains with improving bias.

Nifty extended its gains to reach the 25,800 level, with the bias visibly improving. It can expect a further rise in the coming days. Bank Nifty moved past the crucial hurdle of the 61500 level with the trend improving, and we can anticipate a further rise in the coming days. The market breadth was positive, with the advance-decline ratio indicating nearly 2:1.

## Market Forecast

### Nifty daily range 25600 - 26000

Nifty continues to gain strength, sustaining above the important 50EMA level, which is positioned near the 25680 zone, maintained as the strong near-term support, and currently closing above the 25800 level has further improved bias and sentiment overall. With the broader markets supporting the benchmark index, on the upside, Nifty needs to breach above the important hurdle of the 26000 zone, which shall establish further stability and conviction for further upward movement in the coming days.

Bank Nifty, once again, hit a new high on the closing basis, scaling above the 61500 level, and with the bias maintained strong, hovered near the 61500 zone, and we can expect further upward movement in the coming days with PSU banks gaining strength and carrying on with the positive move further ahead. As said earlier, one can expect the index to gain further for fresh upside targets of 62000 and 62800 levels achievable in the coming days with the 59650 zone as the important support area.

The support for the day is seen at 24600 levels, while the resistance is seen at 26000 levels. Bank Nifty would have the daily range of 61000 - 62000 levels.
