## Market Preview

### Nifty slips further.

Nifty was subjected to high volatility during the session, resisting near the 24600 zone, and with support positioned near the 24300 level, is precariously placed overall, maintaining a cautiously optimistic view for the coming sessions. Bank Nifty witnessed profit booking and slipped near the 58400 zone with bias & sentiment once again maintained with a cautious approach. The market breadth was once again weak, with the advance decline indicating a ratio of 1.5 at close.

## Market Forecast

### Nifty daily range 24300 - 24650

Nifty having a negative opening session on the back of weak cues from the global front, the index made a low near the 24300 zone, from where a bounce back of almost 300 points was witnessed to end near the 24500 zone. Once again we maintain our view that the crucial support zone of the 24200 level needs to be sustained to keep the positive trend intact, failing which one can expect further intensified selling pressure from the counters, with the 23800 level positioned as the next major support, while a decisive close above the 25000 zone would establish some conviction, and thereafter, expect a further rise in the coming days.

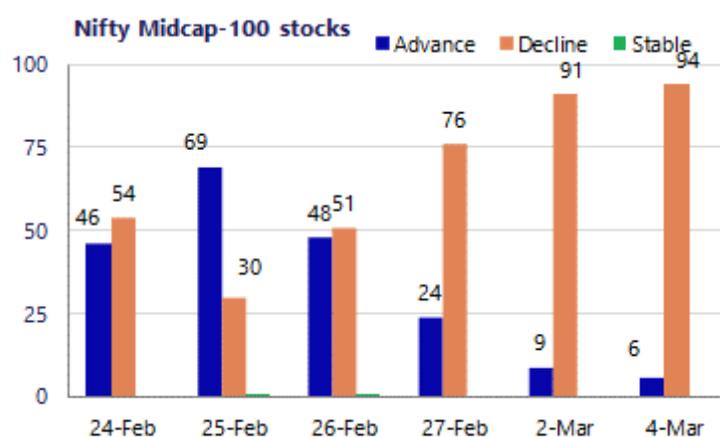

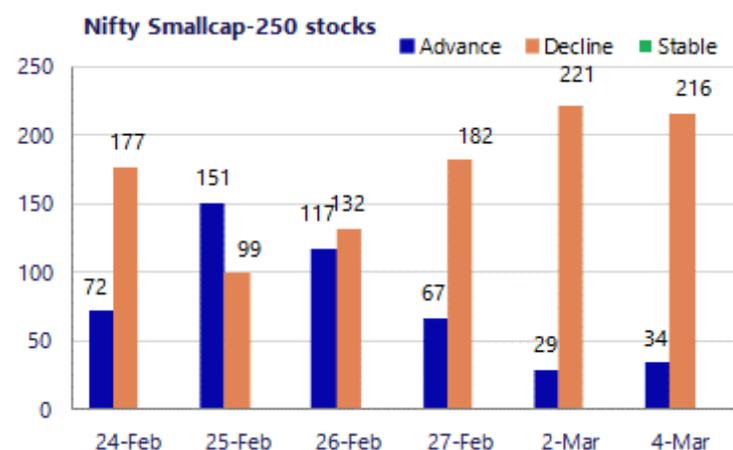

Bank Nifty witnessed some erosion in the morning session but consolidated & bounced thereafter to end near the 58800 zone with bias weakening and would need a revival in the coming sessions to expect some decent pullback in the coming sessions. The index has the important 200-period MA at the 57500 level, which would be the next support zone and would need to be sustained, whereas on the upside, a decisive breach above the 50 EMA zone at the 60000 level is much needed to improve the bias, and thereafter, expect further rise.

The support for the day is seen at 24300 levels, while the resistance is seen at 24650 levels. Bank Nifty would have the daily range of 58000-59500 levels.
