Nifty crashes; snaps 2 day winning sessions

Nifty tanked once again with another lower top formation on the daily chart with new round of selling pressure witnessed having the sentiment maintained with a tense approach. BankNifty witnessed heavy selling pressure to close below the 52300 zone with bias getting weaker. The market breadth turned very weak with the advance decline indicating a ratio of 1:6 at close.

Market Forecast

Nifty daily range 23100 - 23600

Nifty, plunged heavily once again making another prominent lower top formation on the daily chart snapping the 2-day positive sessions and closed near the 22800 zone with sentiment once again getting tense. As mentioned earlier, the index would need to cross above the initial hurdle of 23800 zone decisively, to establish conviction, while the recent low made near 22500 zone shall be positioned as the important and crucial support for the coming days which needs to be sustained.

BankNifty once again crashed losing almost 1500 points with a huge bearish candle finding resistance near the 54200-zone forming another lower top on the daily chart with overall trend getting weaker. The index would need to sustain the near-term important and crucial support at 51300 levels which needs to be sustained, failing which, there can be fresh downward selling pressure triggered with 47800 zone as the next major support.

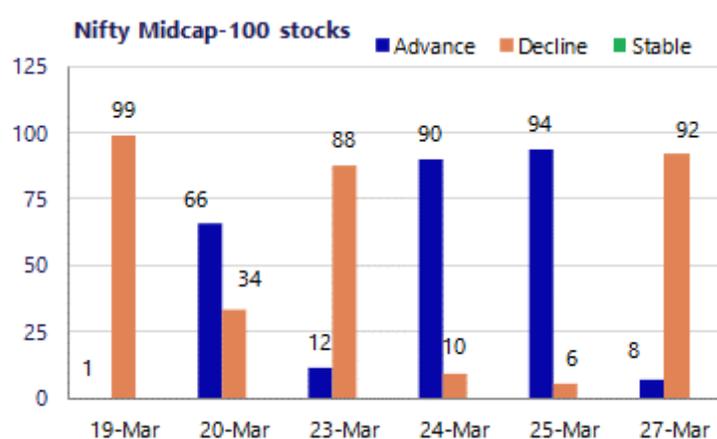

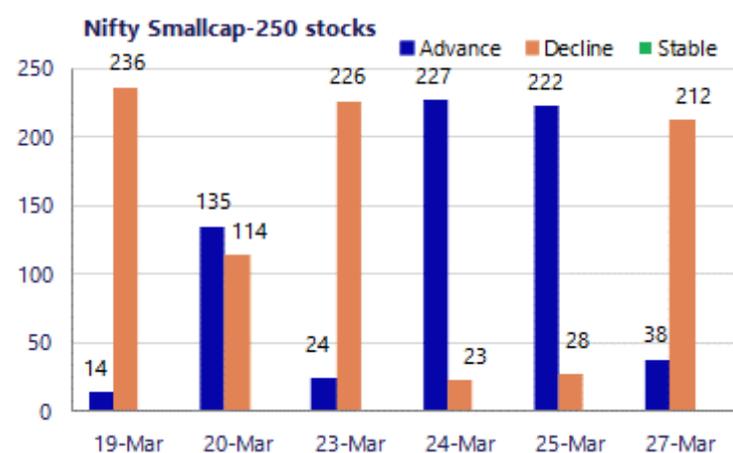

The support for the day is seen at 22500 levels, while the resistance is seen at 23100 levels. BankNifty would have the daily range of 51300-53500 levels.
