Market Preview

Nifty indicates a hammer candlestick

Nifty overall witnessed a weak session but with some revival in the second half has created a hammer candlestick pattern on the daily chart with hopes of some significant revival anticipated. BankNifty more or less with a doji formation closed near the 54250 zone with some recovery visible from the low made near the 53800 level. The market breadth was weak with the advance decline indicating a ratio of 3:5 at close.

Market Forecast

Nifty daily range 22600 - 23000

Nifty witnessed a weak opening session to continue with the slide further to touch the 22600 zone with bias maintained with a very cautious approach and amid some volatility closed near the 22700 level with anxious sentiment anticipated for the coming sessions. The index would have the psychological and important support zone of 22000 level which needs to be sustained failing which the overall trend would turn weak. As mentioned earlier, to improve the bias from current rate, the index would need a decisive breach above the 23100 zone to establish conviction and clarity. BankNifty once again opened on a weak note arriving near the 53800 zone and thereafter, with some revival witnessed managed to close near the 54250 zone with sentiment maintained with a very cautious note having the crucial and major support positioned near the 53000 zone which needs to be sustained failing which the trend would turn weak. At the same time, on the upside, a decisive move above the hurdle at 55800 level is necessary to improve the bias and establish conviction for further progress.

The support for the day is seen at 22600 levels, while the resistance is seen at 23000 levels. BankNifty would have the daily range of 53500-55300 levels.
