Nifty continue to rise further and hit the 25500 level during the intraday session with the trend gaining strength expecting for further follow through of the positive move. Market Forecast

Nifty daily range 25200 - 25600

Nifty extended the gains during the intraday session hitting the high of 25500 level with the trend getting better and closed near the 25400-zone anticipating for further rise in the coming days. However, as we have been mentioning, the chances of some profit cannot be ruled out with the indicators positioned at their highly overbought zone having the important support positioned near the 24800 level which needs to be sustained to maintain the overall bias intact. On the upside, the index would aim to retest the previous peak zone of 26375 zone in the coming days with optimistic view maintained.

BankNifty with a robust move breaching above the previous peak of 61765 level gaining further above the 62000 zone has created history, hitting the All Time High of 62440 level during the intraday session with the trend gaining strength and further rise can be expected in the coming days. As mentioned earlier, on the downside, to fill up the gap, the 59600 level would be the important support whereas on the upside, one can expect for fresh upward move having targets of 63800 and 67000 levels expected as mentioned earlier.

The support for the day is seen at 25200 level, while the resistance is seen at 25600 levels. BankNifty would have the daily range of 61500-63000 levels.
